**Pedagogy of Social Science** Mr. Rohit Manglik, 2023-03-23 In this book we will study about teaching methods for history civics geography and economics in an engaging manner *Inclusion is Dead* Peter Imray, Andrew Colley, 2017-05-18 *Inclusion is Dead* is a provocative polemic against the widely held notion that inclusion for all children and young people with SEN is both possible and desirable For those with severe learning difficulties SLD and profound and multiple learning difficulties PMLD the authors argue it is neither Imray and Colley assert that the dominance of inclusion has meant that there has been no serious attempt to look at the educational difficulties faced by learners with PMLD and SLD As a vision of egalitarianism and equality for all they say inclusion is dead The authors controversially believe that unless education changes it will remain as a disabling institution that does the exact opposite of its intention The book presents the argument that theorists of inclusion have failed to provide practical solutions on how inclusion can be achieved when SLD and PMLD learners are involved as well as discussing the drawbacks of the inclusion for all argument With up to date references throughout *Inclusion is Dead* will be an insightful read for teachers and SENCO trainers as well as postgraduates and undergraduates studying courses on politics philosophy and society

**Institutional Literacies** Stuart A. Selber, 2020-09-04 Information technologies have become an integral part of writing and communication courses shaping the ways students and teachers think about and do their work But too often teachers and other educational stakeholders take a passive or simply reactive role in institutional approaches to technologies and this means they are missing out on the chance to make positive changes in their departments and on campus *Institutional Literacies* argues that writing and

communication teachers and program directors should collaborate more closely and engage more deeply with IT staff as technology projects are planned implemented and expanded Teachers need to both analyze how their institutions approach information technologies and intervene in productive ways as active university citizens with relevant expertise To help them do so the book offers a three part heuristic reflecting the reality that academic IT units are complex and multilayered with historical spatial and textual dimensions It discusses six ways teachers can intervene in the academic IT work of their own institutions maintaining awareness using systems and services mediating for audiences participating as user advocates working as designers and partnering as researchers With these strategies in hand educators can be proactive in helping institutional IT approaches align with the professional values and practices of writing and communication programs

*Warriors for Social Justice and Equality* Linda J. Quintanilla, 2025-03-17 *Warriors for Social Justice* examines the contributions of Mexican American activists to the nation's democratic values by concentrating on the activism of Maria Jimenez 1950-2020 in Houston Texas Linda J Quintanilla tells the life story of this admired immigrant and human rights activist who not only fought racist discriminations such as segregation but also typified other Mexican American activists Quintanilla documents how Jimenez and other activists advanced social justice by promoting our nation's best virtues especially equality In 1971 when only 20 Jimenez already had a definition of what it meant for her to be an activist when I see a problem which I feel needs a solution then I go out to solve it Quintanilla describes her lifelong battle against injustice be it racist sexist or anti immigrant animus The Immigrant Workers Freedom Ride in 2003 only one of her many impressive achievements delighted her the most The experience introduced its participants undocumented immigrants to historic places and African American activists and descendants from the Civil Rights Movement The Freedom Ride Jimenez believed not only was educational but also inspired the immigrants in their long and difficult fight to gain legal status a true victory for social justice Quintanilla uses Critical Race Theory CRT which examines the relationship between race racism and power as the framework for studying Jimenez and Mexican American activism She describes the racial discrimination that the Mexican origin community experienced in Texas with a focus on Houston dating from the state's earliest years and continuing into the twenty first century The commonplace belief in the inferiority of the Mexican origin minority contributed for example to segregation substandard public schools and denial of the vote and jury duty Quintanilla also addresses the violence this community suffered from authorities and examines immigration laws in depth in order to provide a historical context to the current national debate on immigration

**Military Strategy, Joint Operations, and Airpower** Ryan Burke, Michael Fowler, Kevin McCaskey, 2018-09-03 An ideal textbook for classes on modern airpower and joint operations Accounting Thought and Practice Reform Frank Clarke, Graeme William Dean, Martin Persson, 2018-10-09 Raymond John Chambers was born just over a century ago on 16 November 1917 It is more than fifty years since his first classic *Accounting Evaluation and Economic Behavior* was published more than forty since *Securities and Obscurities Reform of the Law of Company Accounts*

republished in 1980 as *Accounting in Disarray* and over twenty since the unique *An Accounting Thesaurus Five Hundred Years of Accounting*. They are drawn upon extensively in this biography of Chambers' intellectual contributions as are other of his published works. Importantly, we also analyze archival correspondence not previously examined. While Chambers provided several bibliographical summaries of his work without the benefits of reviewing and interspersing the text with correspondence materials from the Chambers Archive, this study would lack an appreciation of the impact of his early childhood and nuances related to his practical, including numerous consultancies and academic experiences. The semi-biographical narrative codifies article and editorial length exercises by the authors drawing on parts of the archive related to theory, development, measurement, and communication. Other parts are also examined. This allows us to respond to those critics who claim his reforms were naive. They further reveal a man of theory and practice whose theoretical ideas were solidly grounded on observations from his myriad interests and experiences. Many of his practical experiences have not been examined previously. This approach and the first book-length biography differentiates this work from earlier analyses of Chambers' contribution to the accounting literature. American Accounting Association's 2021 Thomas J. Burns Biographical Research Award winner, this book provides evidence to support the continued push for the reforms he proposed to accepted accounting thought and practice to ensure accounting is the serviceable technology so admired by Pacioli, Da Vinci, and many other Renaissance pioneers. It will be of interest to researchers, educators, practitioners, and regulators alike.

*Machine Intelligence and Big Data Analytics for Cybersecurity Applications* Yassine Maleh, Mohammad Shojafar, Mamoun Alazab, Youssef Baddi, 2020-12-14. This book presents the latest advances in machine intelligence and big data analytics to improve early warning of cyber attacks for cybersecurity intrusion detection and monitoring and malware analysis. Cyber attacks have posed real and wide-ranging threats for the information society. Detecting cyber attacks becomes a challenge not only because of the sophistication of attacks but also because of the large scale and complex nature of today's IT infrastructures. It discusses novel trends and achievements in machine intelligence and their role in the development of secure systems and identifies open and future research issues related to the application of machine intelligence in the cybersecurity field. Bridging an important gap between machine intelligence, big data, and cybersecurity communities, it aspires to provide a relevant reference for students, researchers, engineers, and professionals working in this area or those interested in grasping its diverse facets and exploring the latest advances on machine intelligence and big data analytics for cybersecurity applications.
