The Way of the Linguist Steve Kaufmann, 2005-11 The Way of The Linguist A language learning odyssey It is now a cliché that the world is a smaller place We think nothing of jumping on a plane to travel to another country or continent The most exotic locations are now destinations for mass tourism Small business people are dealing across frontiers and language barriers like never before The Internet brings different languages and cultures to our finger tips English the hybrid language of an island at the western extremity of Europe seems to have an unrivalled position as an international medium of communication But historically periods of cultural and economic domination have never lasted forever Do we not lose something by relying on the wide spread use of English rather than discovering other languages and cultures As citizens of this shrunken world would we not be better off if we were able to speak a few languages other than our own The answer is obviously yes Certainly Steve Kaufmann thinks so and in his busy life as a diplomat and businessman he managed to learn to speak nine languages fluently and observe first hand some of the dominant cultures of Europe and Asia Why do not more people do the same In his book The Way of The Linguist A language learning odyssey Steve offers some answers Steve feels anyone can learn a language if they want to He points out some of the obstacles that hold people back Drawing on his adventures in Europe and Asia as a student and businessman he describes the rewards that come from knowing languages He relates his evolution as a language learner abroad and back in his native Canada and explains the kind of attitude that will enable others to achieve second language fluency Many people have taken on the challenge of language learning but have been frustrated by their lack of success This book offers detailed advice on the kind of study practices that will achieve language breakthroughs Steve has developed a language learning system available online at [www.thelinguist.com](http://www.thelinguist.com)

*The End of Learning* Thomas Festa,2013-09-13 This book shows that education constitutes the central metaphor of John

Milton's political as well as his poetic writing Demonstrating how Milton's theory of education emerged from his own practices as a reader and teacher this book analyzes for the first time the relationship between Milton's own material habits as a reader and his theory of the power of books Milton's instincts for pedagogy and the habits of inculcation everywhere visible in his writings take on a larger political function in his use of education as a trope for the transmission of intellectual history The book therefore analyzes *Paradise Lost* in the complementary contexts of its outright educational claims and more subversive countervailing measures in order to show how Milton dramatizes the end of learning which is to say both its objective and its failure The thesis emphasizes the argumentative resourcefulness of Milton's efforts to liberate readers from the tyrannical bonds of their political innocence most immediately in the context of the failure of Cromwell's regime to establish lasting republican institutions More philosophically the book explores the ways in which Milton's works investigate the humane and intellectual yearning for justice in response to the problem of evil

**Hacking Education in a Digital Age** Bryan Smith, Nicholas Ng-A-Fook, Linda Radford, Sarah Smitherman Pratt, 2018-04-01 In this collection the authors put forth different philosophical conceptions of hacking education in response to the educational societal and technological demands of the 21st century. Teacher Educators are encouraged to draw on the collection to rethink how hacking education can be understood simultaneously as a praxis informed by desires for malice as well as a creative site for us to reconsider the possibilities and limitations of teaching and learning in a digital era. How do we hack beyond the limits of circumscribed experiences, regulated subjective encounters with knowledge and the limits imposed by an ever constrained 21st century schooling system in the hopes of imagining better and more meaningful futures? How do we foster ingenuity and learning as the end itself and not learning as economic imperative in a world where technology in part positions individuals as zombie-like and as an economic end in itself? Can we hack education in such a way that helps to mitigate the black hat hacking that increasingly lays ruin to individual lives, government agencies and places of work? How can we as educators facilitate the curricular and pedagogical processes of reclaiming the term hacking so as to remember and remind ourselves that hacking's humble roots are ultimately pedagogical in its very essence? As a collection of theoretical and pedagogical pieces, the chapters in the collection are of value to both scholars and practitioners who share the same passion and commitment to changing, challenging and reimagining the script that all too often constrains and prescribes particular visions of education. Those who seek to question the nature of teaching and learning and who seek to develop a richer theoretical vocabulary will benefit.

from the insightful and rich collection of essays presented in this collection In this regard the collection offers something for all who might wish to rethink the fundamental dynamics of education or as Morpheus asks of Neo in The Matrix bend the rules of conventional ways of knowing and being

*The Ecology and Semiotics of Language Learning* Leo van Lier, 2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time
