Teaching, Learning and Research in Higher Education Mark Tennant, Cathi McMullen, Dan Kaczynski, 2009-09-10 Teaching Learning and Research in Higher Education offers a combination of critical perspectives and practical advice that is ideally suited for individuals interested in enhancing their practice through analysis and critique The aim is to promote a critical understanding of one s own practices to foster

personal and professional formation through a reflexive engagement with one's environment and circumstances. At a practical level this means to continuously think about how to adjust practice rather than following a formulaic approach derived from any particular educational theory. Teaching Learning and Research in Higher Education argues that academics can find space for their own agency in the midst of institutional policies and practices that serve to frame as well as delimit and constrain what counts as good academic work in teaching and research. This text bridges a gap between those books that provide a high level analysis of contemporary higher education the more practical texts on how to be a good teacher in higher education and those texts which aim to improve teaching through better understanding of the learning process. Topical chapters include Teacher learner relationship Learning groups Practice oriented learning Teaching for diversity e learning Assessment Approaches to Staff Development Quality assurance Supervision and Research education Doing research and Teaching Research. A must have resource for higher education professions academic developers professionals and anyone looking to improve their teaching and learning practices. Teaching Learning and Research in Higher Education is also appropriate for continuing and professional development courses in the UK and teaching and learning courses in the US. Mark Tennant is Dean of the University Graduate School University of Technology Sydney Cathi McMullen is Lecturer in the School of Marketing and Management at Charles Sturt University Dan Kaczynski is Professor in the Educational Leadership department at Central Michigan University. Learning from Each Other Michele Lee Kozimor-King, Jeffrey Chin, 2018-08-21. Learning from Each Other includes 20 original chapters written by well known experts in the field of teaching and learning. Conceived for both new and experienced faculty at community colleges four year institutions and research intensive universities the volume also addresses the interests of faculty and graduate students in programs designed to prepare future faculty and campus individuals responsible for faculty professional development. With the aim of cultivating engagement amongst students and deepening their understanding of the content topics covered in this edited volume include employing the science of learning in a social science context understanding the effects of a flipped classroom on student success pedagogical techniques to create a community of inquiry in online learning environments the risks and rewards of co teaching reaching and teaching non traditional students facilitating learning and leadership in student team projects connecting students with the community through research issues of assessment including backward design developing and using rubrics and defining and implementing the scholarship of teaching and learning. Through Learning from Each Other all faculty who care about their teaching but especially faculty in the social sciences can successfully employ curricular innovations classroom techniques and advances in assessment to create better learning environments for their students.

Learning, Teaching and Assessing in Higher Education Anne Campbell, Lin Norton, 2007-07-12. This is an up to date guide to teaching and learning in higher education addressing issues raised by the Professional Standards Framework. It encourages the development of thoughtful reflective teaching practitioners in higher education and is useful for the review of

existing courses The authors and editors acknowledge the distinctive nature of teaching in higher education explore a variety of creative and innovatory approaches and promote reflective inquiry based and evaluatory approaches to teaching The book supports the professional development of staff involved in teaching supporting and assessing students Interdisciplinary Learning and Teaching in Higher Education Balasubramanyam Chandramohan, Stephen Fallows, 2008-12-04 As universities increasingly offer courses that break the confines of a single subject area more students are enrolling on interdisciplinary programmes within multidisciplinary departments Teaching and learning within interdisciplinary study requires new approaches including an understanding of the critical perspectives and frameworks and the rearranging of intellectual and professional boundaries Interdisciplinary Learning and Teaching in Higher Education explores the issues and tensions provoked by interdisciplinary learning offering helpful information for Staff development Distance learning Mass communication courses Interdisciplinary science courses Grounded in thorough research this collection is the first of its kind to provide practical advice and guidance from around the world improving the quality of teaching and learning in interdisciplinary programmes EBOOK: Enhancing Learning, Teaching, Assessment and Curriculum in Higher Education Veronica Bamber, Paul Trowler, Murray Saunders, Peter Knight, 2009-03-16 Higher education is a particularly complex site for enhancement initiatives This book offers those involved in change a coherent conceptual overview of enhancement approaches of the change context and of the probable interactions between them The book sets enhancement within a particular type of change dynamic which focuses on social practices The aim is to base innovation and change on the probabilities of desired outcomes materializing rather than on the romanticism of policies that underestimate the sheer difficulty of making a difference Following a theoretical introduction to these ideas there are case studies from the UK Australia New Zealand South Africa and Norway at the national institutional departmental and individual levels illustrating the argument that enhancement is best achieved when it works with social practices in real institutional and organizational settings In a final section the authors link the case examples and theoretical frameworks inviting readers to consider their own enhancement situations and apply the frameworks for action offered in earlier sections of the book The book doesn't offer quick fix solutions but aims to support change with practical examples conceptual tools and reflexive questions for those involved in change at all levels It is key reading for higher education lecturers managers educational developers and policy makers **Shaping Higher Education with Students** Vincent C. H. Tong, Alex Standen, Mina Sotiriou, 2018-03-06 Forging closer links between university research and teaching has become an important way to enhance the quality of higher education across the world As student engagement takes centre stage in academic life how can academics and university leaders engage with their students to connect research and teaching more effectively In this highly accessible book the contributors show how students and academics can work in partnership to shape research based education Featuring student perspectives it offers academics and university leaders practical suggestions and inspiring ideas on higher education

pedagogy including principles of working with students as partners in higher education connecting students with real world outputs transcending disciplinary boundaries in student research activities connecting students with the workplace and innovative assessment and teaching practices Written and edited in full collaboration with students and leading educator researchers from a wide spectrum of academic disciplines this book poses fundamental questions about learning and learning communities in contemporary higher education
