**Jurisprudence** Kate Diesfeld, 2018-05-08 International developments within the last twenty years have demonstrated controversial shifts in treatment for people with mental illnesses and the care of persons with intellectual disabilities. These shifts have been apparent in an emphasis on deinstitutionalization, increased scrutiny of detention and discharge decisions, and in some countries, in enforced treatment and care in the community. As we become increasingly conscious of the political and moral dimensions of civil commitment, these concerns are reflected in the professional literature, but this does not often enough focus on issues of clinical and legal principle, nor is it in a form which encourages comparative analysis. This collection draws on contributors from the UK, the USA, Australia, the Netherlands, Canada, and New Zealand who share a commitment to evaluating whether the civil detention processes protect the liberty, dignity, and justice interests of those with mental illnesses and intellectual disabilities. The book is written from a therapeutic jurisprudence perspective and poses a number of questions with international application, such as: Are more categories of people being detained? Is involuntary detention serving new purposes? Are different forms of detention gaining credence and being more widely utilized? And are admission decisions and review of detention decisions transparent, consistent, and just? *Essentials of Nursing Law and Ethics* Susan J. Westrick, 2024-12-10 *Essentials of Nursing Law and Ethics* continues its focus on the legal aspects of Nursing as it relates to patient safety and quality, environmental health and safety, error reduction, and ethical boundaries of practice in an updated third edition.
