Lefebvre For Architects Thinkers For Architects:

Lefebvre for Architects Nathaniel Coleman, 2014-12-05 While the work of Henri Lefebvre has become better known in the English speaking world since the 1991 translation of his 1974 masterpiece *The Production of Space* his influence on the actual production of architecture and the city has been less pronounced Although now widely read in schools of architecture planning and urban design Lefebvre's message for practice remains elusive inevitably so because the entry of his work into the Anglosphere has come with repression of the two most challenging aspects of his thinking romanticism and Utopia which simultaneously confront modernity while being progressive Contemporary discomfort with romanticism and Utopia arguably obstructs the shift of Lefebvre's thinking from being objects of theoretical interest into positions of actually influencing practices Attempting to understand and act upon architecture and the city with Lefebvre but without Utopia and romanticism risks muting the impact of his ideas Although Utopia may seem to have no place in the present Lefebvre reveals this as little more than a self serving affirmation that there is no alternative to social and political detachment Demanding the impossible may end in failure but as Lefebvre shows us doing so is the first step towards other possibilities To think with Lefebvre is to think about Utopia doing so makes contact with what is most enduring about his project for the city and its inhabitants and with what is most radical about it as well Lefebvre for Architects offers a concise account of the relevance of Henri Lefebvre's writing for the theory and practice of architecture planning and urban design This book is accessible for students and practitioners who wish to fully engage with the design possibilities offered by Lefebvre's philosophy

The SAGE Handbook of Cultural Sociology David Inglis, Anna-Mari Almila, 2016-05-09 Cultural sociology or the sociology of culture has grown from a minority interest in the 1970s to become one of the largest and most vibrant areas within sociology globally. In *The SAGE Handbook of Cultural Sociology* a global range of experts explore the theory, methodology and innovations that make up this ever-expanding field. The Handbook's 40 original chapters have been organised into five thematic sections: Theoretical Paradigms, Major Methodological Perspectives, Domains of Inquiry, Cultural Sociology in Contexts, Cultural Sociology and Other Analytical Approaches. Both comprehensive and current, *The SAGE Handbook of Cultural Sociology* will be an essential reference tool for both advanced students and scholars across sociology, cultural studies and media studies.

Merleau-Ponty for Architects Jonathan Hale, 2016-07-01 The philosophy of Maurice Merleau-Ponty (1908-1961) has influenced the design work of architects as diverse as Steven Holl and Peter Zumthor as well as informing renowned schools of architectural theory, notably those around Dalibor Vesely at Cambridge, Kenneth Frampton, David Leatherbarrow and Alberto Pérez Gómez in North America and Juhani Pallasmaa in Finland. Merleau-Ponty suggested that the value of people's experience of the world gained through their immediate bodily engagement with it remains greater than the value of understanding gleaned through abstract mathematical, scientific or technological systems. This book summarizes what Merleau-Ponty's philosophy has to offer specifically for architects. It locates architectural thinking in the context of his work, placing it in relation to themes such as space, movement, materiality and creativity. It introduces key texts, helps decode difficult terms and provides quick reference for further reading.

Architecture and Space Re-imagined Richard Bower, 2016-06-10 As with so many facets of contemporary western life, architecture and space are often experienced and understood as a commodity or product. The premise of this book is to offer alternatives to the practices and values of such westernised space. *Architecture with a capital A* explores the participatory and grass roots practices used in alternative development models in the Global South. This process re-contextualises the spaces, values and relationships produced by such alternative methods of development and social agency. It asks whether such spatial practices provide concrete realisations of some key concepts of Western spatial theory, questioning whether we might challenge the space and architectures of capitalist development by learning from the places and practices of others. Exploring these themes offers a critical examination of alternative development practices, methods in the Global South, re-contextualising them as architectural engagements with socio-political space. The comparison of such interdisciplinary contexts and discourses reveals the political, social and economic resonances inherent between these previously unconnected spatial protagonists. The interdependence of spatial issues of choice, value and identity are revealed through a comparative study of the discourses of Henri Lefebvre, John Turner, Doreen Massey and Nabeel Hamdi. These key protagonists offer a critical framework of discourses from which further connections to socio-spatial discourses and concepts are made, including post-Marxist theory.

orientalism post structural pluralism development anthropology post colonial theory hybridity difference and subalterneity By looking to the spaces and practices of alternative development in the Global South this book offers a critical reflection upon the working practices of Westernised architecture and other spatial and political practices In exploring the methodologies implications and values of such participatory development practices this book ultimately seeks to articulate the positive potential and political of learning from the difference multiplicity and otherness of development practice in order to re imagine architecture and space

Virilio for Architects John Armitage, 2015-06-26 Paul Virilio is an innovative figure in the study of architecture space and the city Virilio for Architects primes readers for their first encounter with his crucial texts on some of the vital theoretical debates of the twenty first century including Oblique Architecture and Bunker Archeology Critical Space and the Overexposed City The Ultracity and Very High Buildings Grey Ecology and Global Hypermovement In exploring Virilio s most important architectural ideas and their impact John Armitage traces his engagement with other key architectural and scientific thinkers such as Claude Parent Benoit B Mandelbrot and Bernard Tschumi Virilio for Architects allows students researchers and non academic readers to connect with Virilio s distinctive architectural theories critical studies and fresh ideas

Architecture, Media, Populism... and Violence Graham Cairns, 2022-10-07 The Storming of the Capitol was for many the culminating media performance of the four year presidency of Donald Trump His presidency and its final act bore all the hallmarks of a 21st century form of populism and media politico spectacle that may yet come to dominate the political scene in the US and worldwide for years to come The questions that such events raise are complex varied and operative across a multitude of disciplines This book engages with these vexed questions in the broad fields of politics and media but does so uniquely through the prism of architecture This book does not however limit its view to the recent events in Washington DC or the United States Rather it seeks to use those events as the starting point for a critique of architecture in the tapestry of mediated forms of protest and political action more generally Each chapter draws on case studies from across timeframes and across nations The book sharpens our critique of the relationship between direct political action its media representation and the role it assigns to architecture as played out globally in the age of mass media In doing so it opens up broader debates about the past present and future roles of architecture as a political tool in the context of international political systems now dominated by changing and unpredictable uses of media and characterised by an increasingly volatile and at times violent form of political activism It is essential reading for any student or researcher engaging with these questions

Utopian Thinking in Law, Politics, Architecture and Technology van Klink, Bart, Soniewicka, Marta, van den Broeke, Leon, 2022-09-15 This is an open access title available under the terms of a CC BY NC ND 4.0 License It is free to read download and share on Elgaronline.com This innovative book explores the role of utopian thinking in law and politics including alternative forms of social engineering such as technology and architecture Building on Levitas Utopia as Method the topic of utopia is addressed within the book from a multidisciplinary perspective

Architect Knows Best Simon Richards, 2016-04-15 The idea that buildings could be used to reform human behaviour and improve society was fundamental to the modernist architecture and planning of people like Walter Gropius Le Corbusier and Jos Luis Sert in the first half of the 20th century Their proposals for functional zoning multi level transport high rise living and machine inspired aesthetics came under attack from the 1950s onwards and many alternative approaches to architecture and planning emerged It was thought that the environmental determinist strand of the discourse was killed off at this time as well This book argues that it was not but on the contrary that it has deepened and diversified Many of the most prominent architect planners continue to design with a view to improving the behaviour of individual people and of society at large By looking at and interviewing major figures and movements of recent years in Britain Europe and America including L on Krier Peter Eisenman Andr s Duany Jane Jacobs Robert Venturi and Denise Scott Brown it demonstrates the myriad ways that architect planners seek to shape human behaviour through buildings In doing so the book raises awareness of this strand within the discourse and examines its different purposes and manifestations It questions whether it is an ineradicable and beneficial part of architecture and planning or a regrettable throwback to a more authoritarian phase discusses why it is seldom acknowledged directly and whether it could be handled more responsibly and with greater understanding Richards does not provide any simple solutions but in conclusion is critical of architect planners who abuse the rhetoric of social reform simply to leverage their attempts to secure building commissions while being more sympathetic towards those who appear to have a sincere desire to improve society through their buildings The Architect ,1872 Architecture, Mentalities and Meaning Patrick Malone, 2017-06-14 In order to function architectural theory and practice must be shaped to suit current cultural economic and political forces Thus architecture embodies reductive logic that conditions the treatment of human and social processes which raises the question of how to define objectivity for architectural mentalities that must conform to a set of immediate conditions This book focuses on meaning and on the physical and mental processes that define life in built environments The potential to draw knowledge from aesthetics psychology political economy philosophy geography and sociology is offset by the fact that architectural logic is inevitably reductive cultural socio economic and political However despite the duty to conform it is argued that the treatment of human processes and the understanding of architectural mentalities can benefit from interdisciplinary linkages small freedoms and cracks in a system of imperatives that can yield the means of greater objectivity This is valuable reading for students and researchers interested in architectural theory as a working reality and in the relationships between architecture and other fields *Thinking of Space Relationally* Xiaoxue Gao, 2021-03-15 Since the relational turn scholars have combated methodological universalism nationalism and individualism in researching social spatial transformations Yet when leaving the gaps between the traveling and local epistemic assumptions unattended engaging relational spatial theories in empirical research may still reproduce established theoretical claims Following the sociology of knowledge tradition and taking Critical Realism as a meta

theoretical framework Xiaoxue Gao takes relational spatial theories as traveling conceptual knowledge and develops meaningful and context sensitive ways of engaging them in studying the complex urban phenomenon in China She offers conceptual elucidations and methodological roadmaps which leap productively from employing plural causal hypotheses to generating effect based explanations for locally observable events They are exemplified by manifold interrogations of Beijing's Artworld as a conjuncture of particular events

Contemporary Manifests on Design Thinking and Practice Zengin, Gözde, Yurtsever, Bengi, 2022-12-27 Design consists of the solution proposals put forward by the designer for the target audience The changing needs of the target audience cause the designer to change the solutions Although the act of designing seems to take place in the triangle of mass object designer it is also affected by the period it is in independently of these components The changing perception of taste with the change of the period the adoption of fast consumption the advancement of technology the attempt to establish the real world in the virtual with this progress and the widespread use of social media causes different effects on different user groups Some users who feel this effect adapt to it and try to meet their needs in parallel while the other part shows a conscious resistance to this effect and prefers to maintain a perception of liking from the past It is important to share these views to break the resistance and ensure the construction of a new agenda

Contemporary Manifests on Design Thinking and Practice reveals the current problems practices and research of the period in design disciplines It gives readers the opportunity to see the impact of the ever present change and transformation in design as a whole Covering topics such as alternative design models social media interaction and urban social sustainability this premier reference source is a dynamic resource for designers architects industrial designers business leaders and executives students and faculty of higher education librarians researchers and academicians

essential text for anyone interested in the study of cities and urban life It will be of use to those in the fields of anthropology economics geography sociology and urban planning Thinking Geographically Brendan Bartley, Phil Hubbard, Rob Kitchin, 2004-10-01 Thinking Geographically offers students and faculty alike an elegant concise and thorough overview of contemporary theoretical concerns in geography Easily accessible to those unfamiliar with social theory this volume pushes the envelope of understanding by sketching the contours of post structuralist spatial thought including such critical emerging topics as geographies of text the body money and globalisation Brief biographies of influential theorists demonstrate how ideas are embodied and personified This volume is highly useful for courses in human geography the history and status of the discipline and will stand as a milestone in the discipline's conceptual understanding over the next decade or more Barney Warf Florida State University The last decade has seen Geography transformed by an astonishing range of cultural and philosophical concepts and approaches Thinking Geographically is designed for students as an accessible and enjoyable introduction to this new landscape of geographical ideas The book takes the reader through the history of geographic thought up to a survey of the present Contemporary theory is then used to explore real world issues drawn from across the discipline of social cultural political and economic geography Entertainingly written and packed with examples and with profiles of key theorists the book is an ideal introduction for any student who wants to discover the potential of thinking geographically *Design Thinking Research* Christoph Meinel, Larry Leifer, 2021-03-26 Extensive research conducted by the Hasso Plattner Design Thinking Research Program at Stanford University in Palo Alto California USA and the Hasso Plattner Institute in Potsdam Germany has yielded valuable insights on why and how design thinking works The participating researchers have identified metrics developed models and conducted studies which are featured in this book and in the previous volumes of this series This volume provides readers with tools to bridge the gap between research and practice in design thinking with varied real world examples Several different approaches to design thinking are presented in this volume Acquired frameworks are leveraged to understand design thinking team dynamics The contributing authors lead the reader through new approaches and application fields and show that design thinking can tap the potential of digital technologies in a human centered way In a final section new ideas in neurodesign at Stanford University and at Hasso Plattner Institute in Potsdam are elaborated upon thereby challenging the reader to consider newly developed methodologies and provide discussion of how these insights can be applied to various sectors Special emphasis is placed on understanding the mechanisms underlying design thinking at the individual and team levels Design thinking can be learned It has a methodology that can be observed across multiple settings and accordingly the reader can adopt new frameworks to modify and update existing practice The research outcomes compiled in this book are intended to inform and provide inspiration for all those seeking to drive innovation be they experienced design thinkers or newcomers **Design for London** Peter Bishop, Lesley Williams, 2020-12-10 Design for London was a unique experiment in urban planning design and strategic

thinking Set up in 2006 by Mayor Ken Livingstone and his Architectural Advisor Richard Rogers the brief for the team was to think about London what made London unique and how it could be made better Sitting within London government but outside its formal statutory responsibilities it was given freedom to question and challenge The team had no power or money but it did have the licence to operate without the usual constraints of government With introductions from Ken Livingstone and Richard Rogers *Design for London* covers the tumultuous and heady period of the first decade of this century when London was a test bed for new ideas It outlines how key projects such as the London Olympics public space programmes high street regeneration and greening programmes were managed critically examines the lessons that might be learnt in strategic urban design and considers how a design agenda for London could be developed in the future *Architectural Thinking in a Climate Emergency* Sofie Pelsmakers, James Benedict Brown, 2025-10-29 What is the role of architecture and the architect in the Anthropocene It is an immutable fact human activity is driving the climate and biodiversity crises that now threaten all life The damage we inflict on the planet undermines basic human rights displaces millions and intensifies structural racism sexism and segregation with the greatest burden falling on the most vulnerable people and ecosystems Architects must act The design and construction of most buildings and urban environments today are rooted in an economic model that pursues infinite growth Our profession is embedded in a paradigm that favours individual gain over collective benefit We are rewarded for overlooking the interdependence between people and the natural world Architecture contributes directly to environmental degradation and social injustice Architects agree that the profession must change But we lack the tools and knowledge to undertake the transformations that are urgently needed This book aims to address that need through 15 chapters illustrating how we can act collectively to make a difference *Architectural Thinking in a Climate Emergency* brings together writers researchers educators students and practitioners working at the forefront of this transformation Contributors come from fourteen countries across Africa Asia Europe North and South America and Oceania Many are leading voices in their fields others are emerging thinkers introducing fresh perspectives from both academia and practice Above all they each affirm the architect's responsibility to help transition toward carbon neutral sustainable practices that advance social and environmental justice *Erik Gunnar Asplund* Malcolm Woollen, 2018-07-16 Taking an interdisciplinary approach weaving together art philosophy history and literature this book investigates the landscapes and buildings of Swedish architect Erik Gunnar Asplund Through critical essays and beautiful illustrations focusing on four projects the Woodland Cemetery the Stockholm Public Library the Stockholm Exhibition and Asplund's own house at Stenn's it addresses the topic of buildings accompanied by landscapes It proposes that themes related to landscape are central to Asplund's distinctive work with these particular sites forming a collection that documents an evolution in his design thinking from 1915 to 1940 The architect himself wrote comparatively little about his design intentions However through close reading and analysis of the selected projects as landscapes with architecture author Malcolm Woollen argues that reflections of the

history of Swedish landscape architecture and the intellectual climate in the late nineteenth and early twentieth centuries are evident in his work and help to explain the architect's intentions. This book is a must have for academics, advanced students and researchers in landscape architecture and design who are interested in Nordic Classicism and the works of Erik Gunnar Asplund. **Planning Paris Before Haussmann** Nicholas Papayanis, 2004-10-13 Publisher Description
