Silver Fox of the Rockies Daniel Tyler, Delph Carpenter, 2003 Delphus E Carpenter 1877 1951 was Colorado s commissioner of interstate streams during a time when water rights were a legal battleground for western states A complex unassuming man as rare and cunning in politics and law as the elusive silver fox of the Rocky Mountain West Carpenter boldly relied on negotiation instead of endless litigation to forge agreements among states first before federal intervention In *Silver Fox of the Rockies* Daniel Tyler tells Carpenter s story and that of the great interstate water compacts he helped create Those compacts produced in the early twentieth century have guided not only agricultural use but urban growth and development throughout much of the American West to this day In Carpenter s time most western states relied on the doctrine of prior appropriation first in time first in right which granted exclusive use of resources to those who claimed them first regardless of common needs Carpenter feared that population growth and rapid agricultural development in states sharing the same river basins would rob Colorado of its right to a fair share of water To avoid that eventuality Carpenter invoked the compact clause of the U S Constitution a clause previously used to settle boundary disputes and applied it to interstate water rights The result was a mechanism by which complex issues involving interstate water rights could be settled through negotiation without litigating them before the U S Supreme Court Carpenter believed in the preservation of states rights in order to preserve the constitutionally mandated balance between state and federal authority Today water remains critically important to the American West and the great interstate water compacts Carpenter helped engineer constitute his most enduring legacy Of particular significance is the Colorado River Compact of 1922 without which Hoover Dam could never have been built

Contemporary Capitalism J. Rogers Hollingsworth, Robert Boyer, 1997 This book argues that there is no single best institutional arrangement for organizing modern societies Therefore the market should not be considered the ideal and universal arrangement for coordinating economic activity Instead the editors argue the economic institutions of capitalism exhibit a large variety of objectives and tools that complement each other and can not work in isolation The various chapters of the book ask what logics and functions institutions follow and why they emerge mature and persist in the forms they do

Admiralty and Maritime Law Thomas J. Schoenbaum, 1987 **Making Climate Lawyers** Kimberly K. Smith, 2024-04-11 Why did it take so long for American law schools to start teaching about climate change Although most

environmental law professors were aware of climate change by 1990 it took nearly fifteen years for them to incorporate the topic into their curriculum In her innovative new work Kimberly K Smith explores how American environmental law professors have addressed climate change identifying the barriers they faced how they overcame them and how they created climate law as a domain of legal specialization Making Climate Lawyers explores the history of why American law schools were resistant to teaching about climate change and how that changed over the course of a forty year period resulting in law schools across the country incorporating climate change into their curricula with many even establishing centers on the environment Smith challenges dominant explanations of why the United States was slow to develop climate policy it wasn't just political opposition or short sightedness Creating climate legal professionals required changing the fundamentals of legal education Based on dozens of interviews with faculty and students Making Climate Lawyers fills a gap in the literature on the intellectual history of climate change most of which focuses on the history of climate science Smith focuses instead on how the climate problem fits or doesn't fit into the structure of American law She uses this story as a lens through which to understand both the transformation of legal education since the 1980s and the nature of climate change as a policy problem
