## **Legal Aspects Of Elder Care:**

**Legal Aspects of Elder Care** Marshall Kapp, 2010-10-25 A wide variety of legal issues surround caring for older individuals. Health and human service practitioners need to plan, provide, and evaluate geriatric care while also understanding public policies. Legal knowledge is an essential part of caring for the elderly. Students and professionals must be able to deliver appropriate care while also being aware of any legal, ethical, and political issues that may arise. *Legal Aspects of Elder Care* provides a clear overview of geriatric policies and laws, enabling the reader to use informed decision making with older clients.

**Elderly Care in India** S. Irudaya Rajan, Gayathri Balagopal, 2017-02-21 This volume highlights a range of issues underpinning elder care in India, with particular focus on the challenges that India faces in caring for the elderly. In addition to the very limited state support and near total dependence on the family for long-term social care and economic support, the changing dynamics between generations in the family structure and privatization of health care in general create new challenges that need to be addressed. Although care plays a significant role in the well-being of the elderly, there is not much research available from India. This volume draws on field-based evidence and the legal framework in India to understand the ways in which care is organized for the elderly and to locate the main sources of care provision. The book addresses key themes such as shrinking of traditional support base of the elderly, trajectory of old-age homes in India, and care arrangements for the elderly within the community. Written by academics and practitioners in the field of gerontology, this book is an informative resource for demographers, gerontologists, social scientists studying aging, and human rights and legal experts working with the aged.

*Legal Aspects of Health Care for the Elderly*, 1988-08-24 Topical listing of 617 selected references to books, chapters, journal articles, and reports published between Jan 1 1980 and Aug 31 1987. Intended for professional personnel and for the benefit of the older health care consumer. Entries give bibliographical information and annotation. Appendix gives information about sources. Author subject indexes.

**Annual Review of Gerontology and Geriatrics, Volume 28, 2008** Harvey L. Sterns, Marie A. Bernard, 2008-12-12 This volume addresses the extraordinary need to educate personnel at all levels in gerontology and geriatric medicine and in the design and delivery of health and social services. The historical development of gerontology and geriatric medicine and education issues are carefully considered with recommendations for curriculum design. The authors offer state-of-the-art discussions on both gerontology and geriatrics with implications for future research. The chapters, written by seminal figures in the field, address the critical need for well-trained faculty and other professionals to educate new and existing faculty and other professionals, educate researchers to accelerate scientific knowledge, provide courses for all students that address life span, life cycle development, and related materials, provide discipline-specific courses on aging and much more.
