Community Bushfire Safety John Handmer, Katharine Haynes, 2008-02-13 Community Bushfire Safety brings together in one accessible and comprehensive volume the results of the most important community safety research being undertaken within the Australian Bushfire Cooperative Research Centre CRC Using perspectives deriving from social science economics and law it

complements the extensive literature already existing on bushfires which ranges from ecology and fire behaviour to information about emergency management. In doing so the book supports the increasing emphasis on community safety and the vital role it has to play in Australian bushfire management. Managing community safety requires a diversity of knowledge and an understanding of the many social processes that shape and ultimately determine a community's resilience to bushfire. The wide range of issues covered in this volume reflects this diversity including research into gender and vulnerability, the law and its implications for public fire agency interactions, the arsonist's rationale, the influence of the media, the role of economics in bushfire management and decision making, understanding declines in fire brigade volunteerism, bushfire safety policy and its implementation, the effectiveness of community education and risk reduction schemes and modes of building ignition. Community Bushfire Safety is accessible to practitioners, policy makers, researchers and students. While the research reported has been undertaken in Australia, much of the material is generic and is likely to be relevant and useful to those dealing with community bushfire safety elsewhere in the world.
