UAV-Based Remote Sensing Volume 2 Felipe Gonzalez Toro, Antonios Tsourdos, 2018-04-27 This book is a printed edition of the Special Issue UAV Based Remote Sensing that was published in Sensors

White Castle: The Evaluation of an Upstanding Prehistoric Enclosure in East Lothian David Connolly, Murray Cook, Hana Kdolska, 2021-03-11 This book describes the results of a four year research programme of archaeological works 2010-2013 at the later prehistoric enclosure of White Castle East Lothian. The excavations demonstrated a clear sequence of enclosure development over time whereby the design and visual impact often appeared to be more important than defence alone

Beyond Digital Representation Andrea Giordano, Michele Russo, Roberta Spallone, 2023-09-01 This book collects contributions which showcase the impact of new augmented reality AR and artificial intelligence AI technologies considered jointly in the fields of cultural heritage and innovative design. AR is an alternative path of analysis and communication if applied to several fields of research in particular if related to space and artifacts in it. This happens because the neural network development strengthens the relationship between augmented reality and artificial intelligence creating processes close to human thought in shorter times. In the last years the AR AI expansion and the future scenarios have raised a deep trans disciplinary speculation. The disciplines of representation, drawing, surveying, visual communication as a convergence place of multidisciplinary theoretical and applicative studies related to architecture, city environment, tangible and intangible cultural heritage are called to contribute to the international debate. The book chapters deal with augmented reality and artificial intelligence analyzing their connections as research tools for knowing the environment. In particular the topics focus on the intersection between real and virtual world and on the heuristic role of drawing in the enhancement and management of cultural heritage in planning and monitoring the architecture, the environment or the infrastructures. Scientists involved in AR and AI research applied separately or together in the field of cultural heritage, architectural design, urban planning and infrastructures analysis as well as members of public and private organizations make up interdisciplinary groups that fuel the discussion focusing on the priorities and aims of the research related to the disciplines of representation

Putting Tradition into Practice: Heritage, Place and Design Giuseppe Amoroso, 2017-07-19 This book gathers more than 150 peer reviewed papers presented at the 5th INTBAU International Annual Event held in Milan Italy in July 2017. The book represents an invaluable and up to date international exchange of research case studies and best practice to confront the challenges of designing places, building cultural landscapes and enabling the development of communities. The papers investigate methodologies of representation, communication and valorization of historic urban landscapes and cultural heritage, monitoring, conservation, management, cultural issues in heritage assessment, placemaking and local identity enhancement as well as reconstruction of settlements affected by disasters. With contributions from leading experts including university researchers, professionals and policy makers, the book addresses all who seek to understand and address the challenges faced in the protection and

enhancement of the heritage that has been created **Portus** S. J. Keay, Antonia Arnoldus-Huyzendveld, 2005 In AD 42 the Emperor Claudius initiated work on the construction of a new artificial harbour a short distance to the north of the mouth of the Tiber The harbour facilities were enlarged at the instigation of the Emperor Trajan at the beginning of the second century AD and Portus remained the principal port for the City of Rome into the Byzantine period The surviving archaeological remains and comments by ancient sources make it clear that Portus lay at the heart of Rome's maritime facade As well as being a key Mediterranean centre for passengers and for the loading unloading transshipment and storage of products from across the Empire it was also designed to make an ideological statement about the supremacy of Rome in the world Portus is thus of key importance to understanding Rome and her relationship to the Empire The project that forms the subject of this book was designed to use non destructive techniques of topographic and geophysical survey in combination with systematic surface collection to provide a new understanding of the plan of Portus The work was undertaken between 1997 and 2002 as a collaboration between the Soprintendenza per i Beni Archeologici di Ostia the British School at Rome and the Universities of Southampton Durham and Cambridge This volume presents the full results of the survey and uses them as the basis for a re evaluation of the whole port complex The geophysical survey results are interpreted in the context of earlier work at the site in order to offer new perspectives on the character and development of the site *Floods in the Ganga-Brahmaputra-Meghna Delta* Aznarul Islam, Pravat Kumar Shit, Dilip Kumar Datta, M. Shahidul Islam, Suvendu Roy, Sandipan Ghosh, Balai Chandra Das, 2023-02-14 This volume covers the floods of the major rivers of the Ganga Brahmaputra Meghna GBM Delta and storm surge related coastal floods in these regions The book is dedicated to addressing floods from an integrated physical social perspective to provide students and researchers with a holistic understanding of floods in terms of both human and geomorphological aspects The systematic coverage of all the major rivers and coastal areas in the GBM delta and surrounding regions will foster a clear comprehension of this dense reservoir of population where thousands of people are impacted every year due to flood hazards and agricultural destabilization This comprehensive treatment of flood issues in the region covers flash floods fluvial floods fluvio tidal floods and coastal floods and outlines flood management strategies to maintain ecological integrity and environmental stability and prevent harmful impacts of future floods The book is intended for students and researchers in earth and environmental sciences especially geomorphology hydrology geography geology natural resources management and regional planning River Health Assessment Suman Mitra, Lakpa Tamang, Sunil Kumar De, 2025-01-09 This book provides in detail assessment of the health of Mahananda river an important head water river system in the Darjeeling Sub Himalayas which is getting altered rapidly with the pace of human interference It covers all aspects of river health monitoring through an effective method combining geospatial analysis and field measurements for the assessment of the hydromorphological hydrochemistry and hydrobiological quality which indicates that it is neither maintaining its overall fluvial characteristics and functions nor can quickly replenish

supporting local biota and sediment transport This book also identifies the factors responsible for existing health condition and suggests target oriented restoration measures for the sustenance of river health essential for restoring the hydro ecological balance of one of the most degraded river The book can be utilized as reference materials by academics practitioners and decision makers for the health assessment of other river basins **Hydrogeology** Gholam A.
