Compact design and high-performance scanning optimize field productivity

Latest standard for phase-based scanners

The "next-generation" Leica HDS6100 significantly reduces field costs and increases phase-based data quality for many types of as-built and site surveys where users want to take advantage of ultra-high speed, phase-based laser scanning.

Up to 508,000 points per second

The Leica HDS6100 features the fastest scan rates available for high-accuracy, as-built surveys, making it the ideal instrument when very short time windows are available for capturing High-Definition Survey™ data.

Highly portable and field-efficient

With scanner, data storage, scanner control, and batteries integrated into a single unit, the Leica HDS6100 is easy to setup and carry for fast project execution. In addition, its

range (up to 79m for 90% surface reflectivity), improved high, and dual-axis (tilt) sensing capability can reduce the number of instrument and target setups, further cutting field time. These same features plus its extended temperature capability also increase the versatility of phase-based scanning.

Flexible scan control & registration options

Users can choose from three scanner control options. A side touch panel allows simple control. An optional wireless PDA allows "touch-free" control, plus visual inspection of jpeg scan images. For full 3D viewing, scan measurement, and rigorous quality assurance (QA), users can opt for powerful laptop control with Leica Cyclone SCAN, the industry's most popular and versatile scanner control software. For accurately registering (or stitching) multiple scans together, Leica Cyclone REGISTER software lets Leica HDS6100 users take advantage of either scan targets or "cloud-to-cloud" registration methods that don't require targets.
