

The Leica MP (P for Professional) is a special model made for press photographers. Instead of the normal hexaprism it is equipped with the "Leicaprism" rapid trigger prism, which makes operation even faster for newspaper and sports photography.

Sequences can be shot in very rapid succession with the Leica MP, and the trigger prism may also be used for single exposures. The film chamber is coupled both with normal lever-actuated on top of the camera and with the rapid trigger-actuated hexaprism.

There is no partitioning mechanism as needed MP, but the camera will accept all standard M 3 lenses.

It is not possible to convert an M 3 into an MP, nor can the Leicaprism be adapted to the standard M 3.
