

Study Guide Answer Key

Learning Activities

1. c, e, d, a, b
2.
 - a. Dilution and stretching of the cervix
 - b. Reduced uterine blood supply during contractions
 - c. Pressure of the fetus on pelvic structures
 - d. Stretching of the vagina and perineum
3.
 - a. Prelabor changes can help the cervix efface and dilate most readily
 - b. Pelvic size and shape influence how readily a fetus descends; may favor normal fetal position or cause fetus to remain in an unfavorable position.
 - c. Short, intense labor may cause greater pain because each contraction does so much work of effacement, dilation, and fetal descent. Rapid labor limits pharmacologic pain control choices and can make it difficult for a woman to use learned skills to cope with labor.
 - d. Fatigue reduces pain tolerance and reduces the woman's ability to use coping skills that she may have learned.
 - e. Unfavorable fetal presentations or positions (such as occiput posterior) can put added pressure on sensitive areas and can prolong labor.
4. Moderate anxiety or fear heightens a woman's interest in learning pain management techniques. Excessive anxiety reduces uterine blood flow, makes contractions less effective, and increases muscle tension that interferes with the powers of uterine contractions.
5.
 - a. Reduces fear of the unknown that would increase muscle tension and therefore pain; release tension to increase effectiveness of uterine contractions and serve as a distraction.
 - b. Conditioning exercises to prepare the body for birth and relieve discomforts such as back discomfort
 - c. Collect this information about specific classes at your clinical facility.
6.
 - a. Provide pain management before pharmacologic methods can be instituted.
 - b. Provide pain control for pain that remains after medications.
 - c. Realistic option if the woman arrives in advanced labor, too late to give narcotic analgesia or institute an epidural block.
7.
 - a. Relaxation is basic to all other methods, because it releases tension that inhibits normal labor. Relaxation techniques also occupy the mind, providing distraction.
 - b. (1) Adjust environment for comfort; (2) hygienic measures; (3) water therapy; (4) orienting to room and procedures, processes of birth; (5) watch for muscle tension and teaching partner same; (6) change position; (7) specific guidance to relax. See also Box 7-1.
8.
 - a. Breathe slowly, especially when exhaling, breathe into cupped hands, place a moist washcloth over mouth and nose, hold breath for a few seconds before exhaling.
 - b. Blow in short breaths when the urge to push occurs.
9.
 - a. Physician who specializes in anesthesia administration
 - b. Registered nurse who has completed additional schooling and taken a certification test to become an advanced-practice nurse in the administration of anesthesia
10. Narcotic analgesics can cause respiratory depression, usually affecting the newborn. Narcotic administration over 1 hour from birth reduces the amount that would affect the infant at the time of birth. Not often given late in labor as epidural is now preferred.
11. Naloxone (Narcan) is used to reverse respiratory depression, usually in the newborn, caused by maternal opioid drugs. Naloxone is not effective against nonopioid hypoxia. Naloxone can be given IV through a peripheral vein or through the umbilical vein immediately after the baby's birth. Naloxone can be given

Leifer Study Guide Answer Key:

Study Guide for Introduction to Maternity and Pediatric Nursing - E-Book Gloria Leifer, 2015-01-29 Leifer's Study Guide for Introduction to Maternity and Pediatric Nursing is a rich resource that enhances your comprehension and application of material from every chapter of the textbook. With a variety of learning activities, critical thinking exercises, case studies, and review questions, this study guide reinforces your mastery of the essential maternity and pediatric nursing concepts and skills you need to pass the NCLEX PN Examination and succeed in your nursing career. NCLEX exam style multiple choice review questions at the end of each chapter test basic chapter knowledge as well as ask for appropriate nursing actions, what the nurse should expect in terms of medical care of the patient, and what complications the patient is at risk of developing. Case Studies and Applying Knowledge activities provide additional opportunities to apply learned information to clinical care. Thinking Critically activities require you to apply what you've learned in the textbook to new situations and draw conclusions based on that knowledge. Learning activities include matching, labeling, and completion exercises to help you learn basic concepts of maternity and pediatric nursing. Crossword puzzles in selected chapters are a nice way to change up the format when testing comprehension of terms and concepts. Answer key is located on the student's Evolve website. Several Thinking Critically sections and case studies with critical thinking questions have been added. Alternate item format questions are included in the review questions for the NCLEX Examination.

Introduction to Maternity and Pediatric Nursing - E-Book Gloria Leifer, 2022-08-31 Build the knowledge and clinical judgment you need to succeed in maternity and pediatric nursing. Written in a clear, easy-to-read style, *Introduction to Maternity and Pediatric Nursing* 9th Edition describes how you can provide effective, evidence-based care for women during pregnancy, labor, and delivery, and for newborns and growing children. The text spans the continuum of child development, organizing topics from simple to complex and from health to illness. This approach makes it easy to locate information. Another hallmark of the book is its strong focus on family-centered care, health promotion, and illness prevention. Written by noted nursing educator Gloria Leifer, this bestselling text includes new Next Generation NCLEX exam style case studies, plus updates on infection control, pandemic responses, and more. Unfolding case studies follow one family through the conception and birth process and include open-ended critical thinking questions applying the content to practice. More than 25 nursing care plans include nursing diagnoses, plus goals, nursing interventions, and rationales, along with critical thinking questions to promote clinical decision-making skills. Detailed nursing skills cover a wide range of maternal and pediatric nursing interventions. Safety alerts highlight the importance of protecting patients and others from accidents, medication errors, and the spread of disease. Nursing tips include practical, evidence-based information applicable in the clinical setting. Nursing guidelines reflect the World Health Organization's Baby-Friendly Hospital Initiative, alternative therapies, immunization mandates, emergency preparedness, preventing medication errors, and more. Get Ready for the NCLEX Examination at the end of each chapter includes a summary of key points, additional online

resources review questions and critical thinking questions Cultural Considerations boxes help you address the needs of culturally diverse patients and families Patient Teaching boxes help you communicate instructions for self care with patients and families Medication tables provide quick access to information about commonly used medications NEW Next Generation NCLEX examination style case studies include new format questions to help you prepare for the licensure examination NEW Discussion of the NCSBN Clinical Judgment Measurement Model helps you learn decision making and develop the skills needed to plan effective nursing interventions NEW Thorough updates include infection control pandemic responses pharmacologic tables and pediatric treatments
