Test Policy in Defense Bernard R. Gifford, Linda C. Wing, 2012-12-06 Bernard R Gifford and Linda C Wing Standardized testing has become a ubiquitous feature of American life As a major source of information for reducing uncertainty in the allocation of merit based educational training and employment opportunities testing affects the life chances of individuals Moreover testing influences the way in which our society judges itself and provides for our collective future Test scores may determine a child's admission to kindergarten and promotion to the first grade Most states award the high school diploma only if a student has passed a minimum competency test Major institutions of higher education typically require applicants to supplement their records of academic achievement with scores on college admissions tests In the labor market as a condition of employment or assignment to training programs more and more employers are requiring workers to sit for personnel selection tests Additionally it has become commonplace to use test scores to calibrate our national sociopolitical condition and our capacity to compete with other countries in the global economy In short with increasing frequency and intensity scores on examinations that purport to be objective and precise measures of individual knowledge abilities and potential are playing a critical role in the opportunity marketplace Similarly test scores are exercising growing influence in assessments of our social and economic institutions and in policy decisions about the relative investments that should be made in each In all these instantiations test scores are at the center of high stakes decision making about the future of individuals and of the nation itself
