Research On STEM Education in the Digital Age Matthias Ludwig, Simon Barlovits, Amélia Caldeira, Ana Moura, 2023 Supporting education through digital technology becomes increasingly important Especially in the light of the Covid 19 pandemic online teaching and learning has been increased massively In these precarious times multiple approaches have been developed to enable the delivery of online education But also for the regular classroom setting more and more technologies are developed and implemented in educational practice This volume contains the papers presented at the Research On STEM Education in the Digital Age ROSEDA Conference held in Porto Portugal in February 2023 The proceedings summarize and link theoretical considerations practical experiences and ideas and empirical research on the use of technology to enrich students learning Hereby the papers focus on the STEM subjects of Mathematics Technology Engineering and Mathematics The ROSEDA Conference and its proceedings are part of the Erasmus Strategic Partnership ASYMPTOTE which is co funded by the European Union *Teaching Legal Education in the Digital Age* Ann Thanaraj, Kris Gledhill, 2022-10-14 Teaching Legal Education in the Digital Age explores how legal pedagogy and curriculum design should be modernised to ensure that law students have a realistic view of the future of the legal profession Using future readiness and digital empowerment as central themes chapters discuss the use of technology to enhance the design and delivery of the curriculum and argue the need for the curriculum to be developed to prepare students for the use of technology in the workplace The volume draws together a range of contributions to consider the impact of digital pedagogies in legal education and propose how technology can be used in the law curriculum to enhance student learning in law schools and lead excellence in teaching Throughout the authors consider what it means to be future ready and what we can do as law academics to facilitate the knowledge skills and dispositions needed by future ready graduates Part of Routledge's series on Legal Pedagogy this book will be of great interest to academics post graduate students teachers and researchers of law as well as those with a wider interest in legal pedagogy or legal practice *Python Arithmetic* Vincenzo Manca, 2024-11-05 The book is a gentle introduction to Python using arithmetic and vice versa with a historical perspective encompassing programming languages within the wider process of development of mathematical notation The revisitation of typical algorithms that are the core of elementary mathematical knowledge helps to grasp their essence and to clarify some assumptions that are often taken for granted but are very profound and of a very general nature The first mathematician to define a systematic system for generating numbers was Archimedes of Syracuse in the third century B C The Archimedean system which was defined in a book with the Latin title *Arenarius* was not intended to define all numbers but only very large numbers 13 22 23 However it can be considered the first system with the three main characteristics of a counting system

that have the most important properties for complete arithmetic adequacy creativity infinity and recursion Creativity means that each numeral is new for numerals that precede it infinity means that after any numeral there is always another numeral recursion means that after an initial sequence of numerals coinciding with the digits of the system digits repeat regularly in all subsequent numerals Since the numerals are finite expressions of digits their lengths increase along their generation In the next chapter Python is briefly introduced by linking this language to standard mathematical notation which took its current form throughout a long process that extends from the introduction of decimal numerals to the eighteenth century particularly within Euler's notational and conceptual framework The third chapter is devoted to counting algorithms showing that something that is usually taken for granted has intriguing aspects that deserve a very subtle analysis the authors will show that the Python representation of counting algorithms is very informative and demonstrates the informational nature of numbers

Theoretical and Practical Teaching Strategies for K-12 Science Education in the Digital Age Trumble, Jason, Asim, Sumreen, Ellis, Joshua, Slykhuus, David, 2023-01-17 Digital age learners come to the science classroom equipped with a wide range of skills and a wealth of information at their fingertips Although science and technology have enjoyed a symbiotic relationship the ubiquity of information technologies requires teachers to modify instruction and experiences for K 12 science learners Environmental and societal changes have impacted how and when students acquire and synthesize knowledge These changes compel us to modify and adjust to improve the practice of teaching science to meet the unique needs of students who are growing up in a society dominated by connected digital devices constant communication and the ubiquity of information *Theoretical and Practical Teaching Strategies for K 12 Science Education in the Digital Age* disseminates theory informed practices for science teachers that increase their instructional effectiveness in teaching digital age learners It communicates how to increase science educators' understandings of the needs of digital age learners develops theoretical and practical teaching strategies that align with science content and integrates technologies for learning with fidelity Covering topics such as design based inclusive science project based learning and science instruction this premier reference source is an excellent resource for administrators and science educators within K 12 education pre service teachers teacher educators librarians researchers and academicians
