review of the international state of research on modeling and measuring competencies in higher education across several academic disciplines is presented along with an evaluation of the field's strengths and weaknesses. Renowned experts share insight into the most important recent research projects and point out controversies and challenges. Competencies are regarded as context-specific dispositions acquired and required to cope successfully with domain-specific situations and tasks. However, the range of these dispositions is controversial. Should only cognitive facets be included or is it important to consider attitudes as well? Insufficient response rates and panel attrition are further challenges, as are the limitations of paper and pencil approaches to the complex measurement of higher education outcomes. Thus, this book may serve as a platform for the exchange of research experiences and perspectives and hopefully will instigate improvements in research into higher education.

education and student learning Campuses have stepped up their initiatives to evaluate educational outcomes and communicate these to their constituencies just as regional state and national efforts have emerged regarding assessment of learning outcomes In this context various methods and approaches to evaluative inquiry have emerged to support efforts to increase the effectiveness and efficiency of instructional practice and curriculum for higher learning This edition examines perspectives on evaluation studies addressing higher education learning from program to institution based studies and critiques of practice to document successes and identify significant challenges that face evaluators and the collaborating educators in the continuing development of higher education This examination represents both an investigation into the particular insights that evaluative inquiry contributes to the scholarship and practice of higher education and a reflection on the evaluation expertise that can be applied across contexts of professional practice and program development This is the 151st issue in the New Directions for Evaluation series from Jossey Bass It is an official publication of the American
