Major Case Management Manual:

Criminal Major Case Management Larry Wilson, 2012-03-23 In high profile investigations when the suspect pool is very large resources are unduly strained unless the pool can be narrowed down to the most likely offenders The Persons of Interest Priority Assessment Tool POIPAT provides an objective and consistent means of establishing a priority ranking of suspects or persons of interest in any investigation Created and used correctly the tool can determine if any suspect POI should be considered a high medium or low investigative priority saving time and resources and potentially saving additional victims Criminal Major Case Management Persons of Interest Priority Assessment Tool POIPAT describes how to set up a POIPAT system for any investigation where there are numerous POIs and limited resources Using the unsolved Jack the Ripper mystery as a sample case study it walks readers through the steps of creating and using the POIPAT system The book begins by providing an overview of offender profiling and the basic considerations for developing elements for a POIPAT It explains the Element Weighting Chart EWC and discusses how many points each element should be weighted based on its level of importance The author describes how to determine what point totals constitute a high medium or low priority so that police managers can know how best to direct their resources He also discusses tracking how POIs are eliminated through an elimination coding system thereby avoiding potential duplication and allowing investigators to hone in on the person most likely to have committed the crime Finally the book uses the POIPAT system to draw conclusions about some of the best known suspects who were most likely to have been the real Jack the Ripper Seeing how the technique is used in a real case investigators will discover how to effectively create unique POIPATs for their own cases The downloadable resources contain a template that can be modified for any type of investigation and a number of additional tools and guides [Criminal Investigative Failures](#) D. Murder City Michael Arntfield,2015-06-09 Like the mythic cities of Gotham or Gomorrah London Ontario was for many years an unrivalled breeding ground of depravity and villainy the difference being that its monsters were all too real In its coming to inherit the unwanted distinction of being the serial killer capital of not just Canada but apparently also the world during this dark age in the city s sordid history the crimes seen in London over this quarter century period remain unparalleled and for the most part unsolved From the earliest documented case of homicidal copycatting in Canada to the fact that at any given time up to six

serial killers were operating at once in the deceptively serene Forest City London was once a place that on the surface presented a veneer of normality when beneath that surface dark things would whisper and stir Through it all a lone detective would go on to spend the rest of his life fighting against impossible odds to protect the city against a tidal wave of violence that few ever saw coming and which to this day even fewer choose to remember With his death in 2011 he took these demons to his grave with him but with a twist a time capsule hidden in his basement and which he intended to one day be opened Contained inside a secret cache of his diaries reports photographs and hunches that might allow a new generation of sleuths to pick up where he left off carry on his fight and ultimately bring the killers to justice killers that in many cases are still out there Murder City is an explosive book over fifty years in the making and is the history of London Ontario as never told before Stranger than fiction tragic ironic horrifying yet also inspiring this is the true story of one city under siege and a book that marks a game changer for the true crime genre Document Retrieval Index ,1974 **Compendium of HHS**
