Maker Projects Guide:

Make Mark Frauenfelder, 2013 MAKE Magazine's annual Maker Faires have become the engine that drives the diverse and ever expanding maker movement. At the heart of these events are the projects that their clever creators bring to show off and to inspire others to create. This special edition of MAKE celebrates the best of these projects as seen at the Faires and in the pages of the magazine as well as profiles of the makers who create them and the Faires that bring them together. *The Maker's Guide to the Zombie Apocalypse* Simon Monk, 2015-10-01 Where will you be when the zombie apocalypse hits? Trapping yourself in the basement. Roasting the family pet. Beheading reanimated neighbors. No way! You'll be building fortresses, setting traps, and hoarding supplies because you, savvy survivor, have snatched up your copy of *The Maker's Guide to the Zombie Apocalypse* before it's too late. This indispensable guide to survival after Z-day, written by hardware hacker and zombie anthropologist Simon Monk, will teach you how to generate your own electricity, salvage parts, craft essential electronics, and out-survive the undead. p. Take charge of your environment. Monitor zombie movement with trip wires and motion sensors. Keep vigilant watch over your compound with Arduino and Raspberry Pi surveillance systems. Power zombie defense devices with car batteries, bicycle generators, and solar power. Escape imminent danger. Repurpose old disposable cameras for zombie-distracting flashbangs. Open doors remotely for a successful sprint home. Forestall subplot disasters with fire and smoke detectors. Communicate with other survivors. Hail nearby humans using Morse code. Pass silent messages with two-way vibration walkie-talkies. Fervently scan the airwaves with a frequency hopper. For anyone from the budding maker to the keen hobbyist, *The Maker's Guide to the Zombie Apocalypse* is an essential survival tool. Uses the Arduino Uno board and Raspberry Pi Model B or Model 2. **Terrific Makerspace Projects** Juan Denzer, Sharona Ginsberg, 2020-08-12 *Terrific Makerspace Projects: A Practical Guide for Librarians* features fifteen customizable projects that were designed as projects created by librarians, makerspace facilitators, rather than projects in which librarians guided others, makerspace users. These projects were showcased during library events with the goal of promoting the makerspace as well as other library services while using them to build connections both within and external to the library. This book outlines maker projects in detail and provides plenty of photos and resources so readers can recreate, customize, and implement them. People at all skill levels in every type of makerspace will find something they can try with projects that range from simple and low-tech to more complex and tech-heavy. Most projects are inexpensive, taking advantage of free online tools, upcycled or repurposed materials, and low-cost electronics such as Arduinos. Each project can be approached as an offering for makerspace visitors or can be created by library employees themselves as tools to engage in outreach and promote the makerspace library services, the institution, and more. Every project has been created and tested in a real library setting by the authors, who present lessons learned, possible variations, and different ideas on how to implement the projects to their fullest extent. Explore the idea of using the makerspace to highlight the value of other library services or simply find new and fun ways to engage with your users. The

book also offers suggestions on how to be a great maker and tips on makerspace safety finding low cost materials and more Whether you re just beginning your makerspace or looking for fresh ideas for your established space this book has something to offer **Make: Maker Projects Guide** Mark Frauenfelder,2013-08-02 MAKE Magazine s annual Maker Faires have
