

The diagram illustrates the greenhouse effect. At the top, a bright orange circle labeled 'Sun' emits numerous rays of light, labeled 'Incoming solar radiation'. These rays travel towards a cross-section of the Earth at the bottom. The Earth is depicted with a blue atmosphere and a green and brown surface. On the left, some rays are shown being reflected away from the Earth's surface and atmosphere, labeled 'Reflection (some of the incoming radiation is reflected by Earth's surface and the atmosphere back out to Space)'. In the center, most rays are shown hitting the Earth's surface, labeled 'Absorption (most radiation is absorbed by the Earth's surface and warms it)'. On the right, rays are shown being emitted from the Earth's surface and atmosphere back out into space, labeled 'Some heat passes out into Space'. Another set of rays is shown being emitted from the atmosphere back towards the Earth's surface, labeled 'Most heat is absorbed and re-emitted by greenhouse gas molecules, further warming Earth'. The word 'Earth' is written in the center of the globe.
