

THROTTLE CONTROL

ADJUSTMENT

WARNING

The throttle control **MUST** operate freely without binding. Irregular or sticking throttle response could result in loss of control of the vehicle and possible personal injury.

See Figure 2-78. With throttle friction screw (5) backed off, the carburetor throttle must return to the closed (left) position. Check control cable adjustment. With engine running, turn handlebars through full range of travel. If engine speed changes during this maneuver, adjust control cables according to the following procedure:

1. See Figure 2-80. Loosen throttle friction screw (7).
2. Slide rubber foot off each cable adjuster (4).
3. Loosen jam nut on each adjuster.
4. Turn adjusters in direction which will shorten cable housing to minimum length.

Figure 2-78. Throttle Control - Right Handlebar

5. Point front wheel straight ahead. Test throttle control grip (2) to fully open position and back.

1. Throttle friction screw
2. Throttle control (pull-open) cable
3. Side control (pull-close) cable
4. Cable adjuster (2)
5. Throttle control grip
6. Throttle cam stop
7. Carburetor stop plate
8. Side control cable guide (see carburetor)
9. Throttle control cable guide (see carburetor)

Figure 2-80. Throttle Control Cable/Choke Control Cable

6. Turn adjuster (4) on throttle control cable (2) until throttle cam stop (6) touches carburetor stop plate (7). Tighten jam nut on throttle control cable adjuster (4). Release throttle control grip (2).
7. Turn handlebars fully to right. Turn adjuster (4) on side control cable (3) until end of cable housing just touches spring within carburetor cable guide (8).
8. With throttle friction screw (7) loosened, test and release throttle control grip (2) a few times. Carburetor throttle must return to idle position each time throttle grip is released. If this is not the case, turn adjuster (4) on side control cable (3) (shortening cable housing) until throttle control functions properly.
9. Tighten jam nut on side control cable adjuster (4). Recheck operation of throttle control (Step 6).
10. Slide rubber foot over each cable adjuster (4). Recheck engine idle and speed. Adjust if required.

REMOVAL/DISASSEMBLY

(Figure 2-79)

1. Slide rubber foot off each cable adjuster (11). Loosen jam nut on each adjuster. Turn adjusters in direction which will shorten cable housings to minimum length.
2. Remove two screws (1) and separate upper housing (2) from lower housing (3).
3. Unhook bracket (4) and cables (5) from throttle control grip (6) and lower housing (3).
4. Remove air cleaner assembly. See AIR CLEANER, REWORKS, in Section 4.
5. Disconnect cables from carburetor.
6. Remove friction spring (7), throttle friction screw (8) and spring (9) from lower housing (3).

CLEANING, INSPECTION, AND REPAIR

Clean all parts in a non-flammable cleaning solvent. Blow dry with compressed air. Replace cables if frayed, kinked or bent.

ASSEMBLY/INSTALLATION

(Figure 2-79)

1. Apply a light coating of graphite to the handlebar (10) and the inside surface of the switch housings (2 and 3).
2. Install throttle spring (8), throttle friction screw (9) and friction spring (7) in lower housing (3).
3. Attach cable assemblies (5) to lower housing (3). (See Figure 2-80. Throttle control cable (2) has a 5/16 in. (7.9 mm) fitting end and is positioned in front of lower housing. Side control cable (3) has a 1/4 in. (6.3 mm) fitting end and is positioned to rear of lower housing.)

4. See Figure 2-79. Install throttle control grip (6) over end of right handlebar (10). Position lower housing (3) onto right handlebar, engaging lower housing with throttle control grip. Position bracket (4) over cable (5) and ends, then add bracket (with cables attached) in their respective positions of the throttle control grip.
5. Install upper housing (2) over right handlebar (10) and secure to lower housing (3) using screws (1). Tighten screws to 16-24 ft-lbs. (24-32 Nm) torque.
6. See Figure 2-81. Route control cables forward from throttle control grip, forward of front fender upper bracket, downward between right side tube and headlight, rearward along right side of frame steering head, rearward along right side of frame lockbars into retaining clip on ignition switch housing, downward to carburetor.

Figure 2-81. Center Cable Routing

7. See Figure 2-80. Install side control cable (3) housing and spring into fender, inward cable guide (8) on carburetor.
8. Install throttle control cable (2) housing into upper, outward cable guide (8) on carburetor.

WARNING

Throttle cables must not pull tight when handlebars are turned fully to left or right fork stops. Be sure wires and throttle cables are clear of fork stops at steering head so they will not be pinched when fork is turned against stops. Binding must be smooth and free with no binding or interference. Improperly adjusted and/or positioned throttle cables could result in loss of control of vehicle resulting in possible personal injury.

9. Adjust control cables. See THROTTLE CONTROL, ADJUSTMENT.
