October 2001 Hilmy Sally,Charles L. Abernethy,2011-10-21 Only 4 percent of arable land in sub Saharan Africa is irrigated
using just 2 percent of the available water resources Furthermore 18 percent of the area equipped for irrigation is not
utilized at all and the intensity of use varies between 50 percent and 80 percent This highlights the huge potential available
for intensifying and expanding irrigated area provided that the investments required can be successfully mobilized However
it must be noted that if investments in irrigation are to yield satisfactory returns investments must also be made in a series of
related activities Current global figures for the amount of private investment in irrigation confirm that good returns can
indeed be achieved Prospects for sub Saharan Africa would be far more favorable if public development assistance
