Knowledge And Social Imagery:

Knowledge and Social Imagery David Bloor, 1991-09-24 The first edition of this book profoundly challenged and divided students of philosophy sociology and the history of science when it was published in 1976 David Bloor's radical claim was that the sciences even hard sciences such as physics and mathematics are dependent on social factors such as conventions interests traditions and prestige as they are on observable physical phenomena or abstract logical necessity In this second edition Bloor responds in a substantial new Afterword to the heated debates engendered by his book

Knowledge and Social Imagery David Bloor, 1976 *Knowledge as Social Order* Massimo Mazzotti, 2016-04-22 Investigating a theme first pioneered by Barry Barnes in the early 1970s this volume explores the relationship between social order and legitimate knowledge and is intended as a tribute to Barnes seminal role in the development of the discipline of science and technology studies STS The contributors highlight the way in which Barnes work has shaped their way of conceptualizing the basic relation between knowledge and society In doing this they explore the original sociological underpinnings of STS while pointing to the way in which Barnes interdisciplinary work has been developed to tackle current concerns in the field as well as in social theory They also address the concerns of social scientists who are investigating the nature of power and agency and the problem of social order emphasizing the essential role played by scientific knowledge and technological machinery in the construction of social life Contributors to the volume include Martin Kusch Steven Loyal Mark Haugaard David Bloor Trevor Pinch John Dupre Donald MacKenzie Harry Collins Steven Shapin and Karin Knorr Cetina

Science as Social Existence Jeff Kochan, 2017-12-18 In this bold and original study Jeff Kochan constructively combines the sociology of scientific knowledge SSK with Martin Heidegger's early existential conception of science Kochan shows convincingly that these apparently quite different approaches to science are in fact largely compatible even mutually reinforcing By combining Heidegger with SSK Kochan argues we can explicate elaborate and empirically ground Heidegger's philosophy of science in a way that makes it more accessible and useful for social scientists and historians of science Likewise incorporating Heideggerian phenomenology into SSK renders SSK a more robust and attractive methodology for use by scholars in the interdisciplinary field of Science and Technology Studies STS Kochan's ground breaking reinterpretation of Heidegger also enables STS scholars to sustain a principled analytical focus on scientific subjectivity without running afoul of the orthodox subject object distinction they often reject *Science as Social Existence* is the first book of its kind unfurling its argument through a range of topics relevant to contemporary STS research These include the epistemology and metaphysics of scientific practice as well as the methods of explanation appropriate to social scientific and historical studies of science *Science as Social Existence*

puts concentrated emphasis on the compatibility of Heidegger's existential conception of science with the historical sociology of scientific knowledge pursuing this combination at both macro and micro historical levels Beautifully written and accessible Science as Social Existence puts new and powerful tools into the hands of sociologists and historians of science cultural theorists of science Heidegger scholars and pluralist philosophers of science *Social Imagery in Middle Low German* Cordelia Hess, Cordelia Heß, 2013-06-20 Social imagery during the Late Middle Ages was typically considered to be dominated by the three orders oratores bellatores laboratores as the most common way of describing social order along with body metaphors and comprehensive lists of professions as known from the Danse macabre tradition None of these actually dominates within the vast genre of lay didactical literature This book comprises the first systematic investigation of social imagery from a specific late medieval linguistic context It methodically catalogues images of the social that were used in a particular cultural literary sphere and it separates late medieval efforts at catechization in print from the social and religious ruptures that are conventionally thought to have occurred after 1517 The investigation thus compliments recent scholarship on late medieval vernacular literature in Germany most of which has concentrated on southern urban centres of production The author fills a major lacuna in this field by concentrating for the first time on the entire extant corpus of vernacular print production in the northern region dominated by the Hanseatic cities and the Middle Low German dialect **Critical**

Realism Margaret Archer, Roy Bhaskar, Andrew Collier, Tony Lawson, Alan Norrie, 2013-06-17 Critical realism is a movement in philosophy and the human sciences most closely associated with the work of Roy Bhaskar Since the publication of Bhaskar's A Realist Theory of Science critical realism has had a profound influence on a wide range of subjects This reader makes accessible in one volume key readings to stimulate debate about and within critical realism It explores the following themes transcendental realist the theory of explanatory critique dialectics Bhaskar's critical naturalist philosophy of science

Masons, Tricksters and Cartographers David Turnbull, 2000 This highly original study puts forward the notion that every culture has its own ways of assembling local knowledge thereby creating space through the linking of people practices and places **A House Built on Sand** Noretta Koertge, 1998 Cultural critics say that science is politics by other means arguing that the results of scientific inquiry are profoundly shaped by the ideological agendas of powerful elites They base their claims on historical case studies purporting to show the systematic intrusion of sexist racist capitalist colonialist and or professional interests into the very content of science In this hard hitting collection of essays contributors offer crisp and detailed critiques of case studies offered by the cultural critics as evidence that scientific results tell us more about social context than they do about the natural world Pulling no punches they identify numerous crude factual blunders e g that Newton never performed any experiments and egregious errors of omission such as the attempt to explain the slow development of fluid dynamics solely in terms of gender bias Where there are positive aspects of a flawed account or something to be learned from it they do not hesitate to say so Their target is shoddy scholarship Comprising new essays by

distinguished scholars of history philosophy and science this book raises a lively debate to a new level of seriousness

Culture and Agency Margaret Scotford Archer,1996-09-26 Margaret Archer s *Culture and Agency* was first published in 1988 and proved a seminal contribution to social theory and the case for the role of culture in sociological thought Described in *Sociological Review* as a timely and sophisticated treatment the book showed that the problems of culture and agency on the one hand and structure and agency on the other could be solved using the same analytical framework In this revised edition of *Culture and Agency* Margaret Archer contextualises her argument in 1990s cultural sociology and links it explicitly to her latest book *Realist Social Theory The Morphogenetic Approach* Cambridge University Press 1995

Whose Science? Whose Knowledge? Sandra G. Harding,2016-12-01 Sandra Harding here develops further the themes first addressed in her widely influential book *The Science Question in Feminism* and conducts a compelling analysis of feminist theories on the philosophical problem of how we know what we know Following a strong narrative line Harding sets out her arguments in highly readable prose In Part 1 she discusses issues that will interest anyone concerned with the social bases of scientific knowledge In Part 2 she modifies some of her views and then pursues the many issues raised by the feminist position which holds that women s social experience provides a unique vantage point for discovering masculine bias and and questioning conventional claims about nature and social life In Part 3 Harding looks at the insights that people of color male feminists lesbians and others can bring to these controversies and concludes by outlining a feminist approach to science in which these insights are central Women and men cannot understand or explain the world we live in or the real choices we have she writes as long as the sciences describe and explain the world primarily from the perspectives of the lives of the dominant groups Harding s is a richly informed radical voice that boldly confronts issues of crucial importance to the future of many academic disciplines Her book will amply reward readers looking to achieve a more fruitful understanding of the relations between feminism science and social life

Scientific Knowledge in Controversy Brian Martin,1991-01-01 *Scientific Knowledge in Controversy* The

Social Dynamics of the Fluoridation Debate is a study of today's most heated and long lived health controversy as well as a study of the role of power in science. It uses the tools of sociology of knowledge and political economy to analyze battles over scientific evidence and the struggle for scientific credibility, the exercise of professional power to suppress opponents and the role of corporate interests in the debate. The evidence from a variety of countries offers a new perspective on the fluoridation issue and also shows how to link the analysis of rhetoric in scientific disputes with the wider analysis of power in society.

Reconsideration of Science and Technology II Liu Dachun, Ai Zhiqiang, Yang Huili, 2022-09-30. In reviewing and reconsidering the intellectual history of scientism and antiscientism, the authors assess the process of reasoning and prejudices of these contrasting viewpoints while discussing the repercussions of scientific hegemony and its contemporary criticism. As the second volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world, this title focuses on ideological trends centering around scientism and anti scientism since the 19th century. The six chapters look into the emergence of scientism, instrumental reason, scientific optimism, scientific pessimism, scientific crisis and irrationalism, and finally the deconstruction of scientism. The authors provide insight into the connections and biases of these disparate views and critiques, explore the influences of the hegemony of science and contemporary critique of science, and evaluate the value of postmodernism and deconstructivism. The volume will appeal to scholars and students interested in the philosophy of science and technology, the ideology of scientism and anti scientism, modernism and postmodernism, Marxist philosophy, and topics related to scientific culture.

[Social Experience and Anthropological Knowledge](#) Kirsten Hastrup, Peter Hervik, 2003-12-16. Anthropology poses an explicit challenge to standard notions of scientific knowledge. It claims to produce genuine insights into the workings of culture in general on the basis of individual social experience in the field. [Social Experience and Anthropological Knowledge](#) traces the process from the ethnographic experience to the analytical results, showing how fieldwork enables the ethnographer to arrive at an understanding not only of culture and society but also of the processes by which cultures and societies are transformed. The contributors challenge the distinction between subjectivity and objectivity, redefine what we should mean by empirical, and demonstrate the complexity of present day epistemological problems through concrete examples. By demystifying subjectivity in the ethnographic process and re-emphasizing the vital position of fieldwork, they do much to renew confidence in the anthropological project of comprehending the world.
