Spray Drying Techniques for Food Ingredient Encapsulation C. Anandharamakrishnan, Padma Ishwarya S., 2015-10-12 Spray drying is a well established method for transforming liquid materials into dry powder form Widely used in the food and pharmaceutical industries this technology produces high quality powders with low moisture content resulting in a wide range of shelf stable food and other biologically significant products Encapsulation technology for bioactive compounds has gained momentum in the last few decades and a series of valuable food compounds namely flavours carotenoids and microbial cells have been successfully encapsulated using spray drying Spray Drying Technique for Food Ingredient Encapsulation provides an insight into the engineering aspects of the spray drying process in relation to the encapsulation of food ingredients choice of wall materials and an overview of the various food ingredients encapsulated using spray drying The book also throws light upon the recent advancements in the field of encapsulation by spray drying i.e. nanospray dryers for production of nanocapsules and computational fluid dynamics CFD modeling Addressing the basics of the technology and its applications the book will be a reference for scientists engineers and product developers in the industry

Functional Foods and Nutraceuticals

Chukwuebuka Egbuna, Genevieve Dable Tupas, 2020-08-24 Functional foods and nutraceuticals are food products that naturally offer or have been modified to offer additional health benefits beyond basic nutrition. As such products have surged in popularity in recent years, it is crucial that researchers and manufacturers understand the concepts underpinning functional foods and the opportunity they represent to improve human health, reduce healthcare costs, and support economic development worldwide. *Functional Foods and Nutraceuticals: Bioactive Components, Formulations, and Innovations* presents a guide to functional foods from experienced professionals in key institutions around the world. The text provides background information on the health benefits, bioavailability, and safety measurements of functional foods and nutraceuticals. Subsequent chapters detail the bioactive components in functional foods responsible for these health benefits, as well as the different formulations of these products and recent innovations spurred by consumer demands. Authors emphasize product development for increased marketability, taking into account safety issues associated with functional food adulteration and solutions to be found in GMP adherence. Various food preservation methods aimed at enhancing the quality and shelf life of functional food are also highlighted. *Functional Foods and Nutraceuticals: Bioactive Components, Formulations, and Innovations* is the first of its kind, designed to be useful to students, teachers, nutritionists, food scientists, food technologists, and public health regulators alike.

Optimum Vitamin Nutrition for More Sustainable Swine Farming Edgar Oviedo-Rondon, Clemente López-Bote, Gilberto Litta, José-María Hernández, 2023-08-31 Food production, particularly animal protein production, is changing. While productivity, efficiency, and food quality continue to be of vital importance, there is increasing pressure on producers to prioritize sustainability and animal health and welfare, as well as minimize food waste. Optimizing vitamin nutrition can help make animal production more sustainable by optimizing animal health and welfare and animal performance and food quality while reducing food waste. *Optimum Vitamin Nutrition for More Sustainable Swine Farming* contains concise, up-to-date information on vitamin nutrition for swine. This book, which follows the authoritative *Optimum Vitamin Nutrition in the Production of Quality Animal Foods* (5m Books, 2013), is a reference for research and extension specialists who need the most current research-based information on vitamins in swine. This book is part of a series covering *Optimum Vitamin Nutrition in poultry, ruminants, and aquaculture*.

Nutraceuticals in Brain Health and Beyond Dilip Ghosh, 2020-11-12 *Nutraceuticals in Brain Health and Beyond* focuses on a variety of health disorders where intervention with nutritional supplements proves valuable, such as Alzheimer's, Parkinson's, autism, and attention deficit disorder in children. In addition, *Nutraceuticals in Brain Health and Beyond* addresses herb-nutra psychiatry, which is a field of research focused on developing a comprehensive, cohesive, and scientifically rigorous evidence base to shift conceptual thinking around the role of diet and nutrition in mental health. Intended for nutrition researchers, nutritionists, dietitians, regulatory bodies, health professionals, and students studying related fields, *Nutraceuticals in Brain Health and Beyond* will be a useful reference in understanding the links between nutrition and brain health. Addresses nutritional psychiatry and
