digital centric era This critical examination of educational technology s contemporary semantics and constructs fills a major gap in the logical foundations of instruction with special attention to the patterns of communication among facilitators learners and resources The book proposes a new framework for organizing research and theory clear concepts and definitions for its basic elements and a new typology of teaching learning arrangements to simplify the selection of optimal conditions for a variety of learning goals As trends in media technology and methodology continue to evolve these historically contextual back to basics pedagogical tools will be invaluable to all instructional designers and educational researchers

Gifted?: The shift to enrichment, challenge and equity Morgan Whitfield,2024-07-19 Gifted and talented is a zombie It is dead but still walking around There are new labels to stratify students more able significantly able high aptitude learners New labels do not equal new thinking The concept of gifted is still stubbornly embedded in our educational structures with its legacy of social immobility racism and sexism Students can be more able when they have more financial resources more access more visibility or more cultural acceptance There are pervasive narratives that educators should prioritise extension for some students and not others We can dispel the myth that pitching lessons judiciously to middle ability and then differentiating up and down is effective This book explores how we can provide every student with rigorous challenge Challenge for all is an inclusive approach to teaching whereby every student is invited and given the tools to reach a place of mastery This can be through project based learning Harkness round tables oracy adaptive teaching inclusive enrichment programs dynamic classroom strategies and a schoolwide mission for equity Educators can embed powerful knowledge into the curriculum reimagine teaching to the top and stretch learners through personalised and responsive instruction The shift to enrichment challenge and equity creates magnificent possibilities The message to all students is you belong here

Listening to Teach Leonard J. Waks,2015-10-14 First book to offer a survey of pedagogical listening in conventional and alternative methodologies What happens when teachers step back from didactic talk and begin to listen to their students After decades of neglect we are currently witnessing a surge of interest in this question Listening to Teach features the leading voices in the recent discussion of listening in education These contributors focus close attention on the key role of teachers as they move away from didactic talk and begin to devise innovative pedagogical strategies that encourage active listening by teachers and also cultivate active listening skills in learners Twelve teaching approaches are explored from Reggio Emilia s project method and Paulo Freire s pedagogy of the oppressed to experiential learning and philosophy for children Each chapter offers a brief explanation of one of these approaches its background the problems it aims to resolve the educators who have pioneered it and its treatment of listening The chapters conclude with ideas and suggestions drawn from these pedagogies that may be useful to classroom teachers
