Cartilage and Osteoarthritis Massimo Sabatini, Philippe Pastoureau, FrTdTric De Ceuninck, 2008-02-01 Osteoarthritis OA the most common form of arthritis is generally characterized by a slowly progressive degeneration of articular cartilage particularly in the weight bearing joints It has a stronger prevalence in women and its incidence increases with age OA is a major and growing health concern in developed countries owing to steadily increasing life expectancy and the demand for better quality of life Because of its chronic nature and nonfatal outcome OA affects the growing population of the elderly over an increasing time span Moreover despite its relatively benign character OA is one of the most disabling diseases it is responsible for increasing financial and social burdens in terms of medical treatments forced inactivity loss of mobility and dependence Despite a growing awareness of OA as a medical problem that has yet to reach its maximum impact on society there is a surprising absence of effective medical treatments beyond pain control and surgery So far only symptom modifying drugs are available while there remains a major demand for disease modifying treatments of proven clinical efficacy This demand will hopefully be met in the future by some of the drugs that have been pressed into development and

are now at different stages of clinical investigation Nevertheless the current lack of effective treatments reflects a still insufficient knowledge of cartilage with respect to its metabolism interactions with other joint tissues and causes and mechanisms possibly of very different nature leading to failure of its turnover

Sensors Application in Agriculture Dimitrios S. Paraforos,Spyros Fountas,Francesco Marinello,2020-11-06 Novel technologies are playing an important role in the development of crop and livestock farming and have the potential to be the key drivers of sustainable intensification of agricultural systems In particular new sensors are now available with reduced dimensions reduced costs and increased performances which can be implemented and integrated in production systems providing more data and eventually an increase in information It is of great importance to support the digital transformation precision agriculture and smart farming and to eventually allow a revolution in the way food is produced In order to exploit these results authoritative studies from the research world are still needed to support the development and implementation of new solutions and best practices This Special Issue is aimed at bringing together recent developments related to novel sensors and their proved or potential applications in agriculture

European Workshop on Structural Health Monitoring Piervincenzo Rizzo,Alberto Milazzo,2022-06-21 This volume gathers the latest advances innovations and applications in the field of structural health monitoring SHM and more broadly in the fields of smart materials and intelligent systems as presented by leading

international researchers and engineers at the 10th European Workshop on Structural Health Monitoring EWSHM held in Palermo Italy on July 4-7 2022. The volume covers highly diverse topics including signal processing, smart sensors, autonomous systems, remote sensing, and support UAV platforms for SHM, Internet of Things, Industry 4.0, and SHM for civil structures and infrastructures. The contributions, which are published after a rigorous international peer review process, highlight numerous exciting ideas that will spur novel research directions and foster multidisciplinary collaboration among different specialists.
