Mastering Trademark And Unfair Competition Law Mastering Series:

Mastering Trademark and Unfair Competition Law Lars S. Smith, Llewellyn Joseph Gibbons, 2013 *Mastering Trademark and Unfair Competition Law* provides a clear and concise presentation of the basic principles underlying and the challenges facing a student or practitioner of trademark law in a digital age. This book traces the evolution of trademark law from its origin as a common law tort of unfair competition and associated common law trademark rights to the most recent amendments to the federal Lanham Trademark Act. The book lays a solid foundation covering the basics of obtaining trademark and trade dress rights, federal trademark registration practice including a discussion of practice before the TTAB, trademark infringement defenses and remedies. *Mastering Trademark and Unfair Competition Law* also has extensive coverage of the dilution of famous trademarks. *Mastering Trademark and Unfair Competition Law* thoroughly discusses all of the elements of the modern trademark practice. It has extensive discussions of new technologies such as Internet domain names, web pages, keyword advertising, virtual worlds and computer games as well as how trademark law has responded to the challenges presented by new forms of trademark use. There are chapters on cybersquatting under the Uniform Domain Name Resolution Policy (UDRP) and international trademark law including review of treaties such as the Paris Convention and the Madrid Protocol. The goal of this book is to ground the reader in the law, policies and theories of trademark law so that the reader can better understand the legal and economic role of trademarks and brands in a modern economy. Mastering the Game World Intellectual Property Organization, *Mastering the Game* provides professionals in the videogames industry with practical insights and guidance on legal and business issues related to the use of intellectual property protection in this area. The training material takes the reader through all stages of the game development and distribution process, pointing out the role of intellectual property in relation to the various uses of the content. Mastering the Changing Information World Martin L. Ernst, 1993. The introduction of new technologies exerts a profound influence on our ways of thinking about current businesses and issues. They quickly make obsolete the products and services that these businesses provide. Nowhere has this been more evident in the early 1990s and the decades before than in the information industries, the focus of this book.
