thinking and experience of an international group of eight distinguished economists on this changing function of government in the development process Many governments have withdrawn from direct involvement in certain sectors of the economy and have reduced their intervention and control in others most dramatically in the former centrally planned economies but also in developing countries and in advanced countries where markets are already pre eminent In this process it has been recognized that left entirely to their own devices markets may be either inadequate or inappropriate for a country s overall economic and social development Government has a vital role to play even in facilitating the effective functioning of markets to ensure the necessary infrastructure is in place to sustain macroeconomic stability to provide a framework for effective interaction with the international economy It also has a responsibility to correct the market s inclinations in certain directions in particular to provide a fuller perspective on the future to give direction in critical sectors and importantly to fulfil a number of social objectives The challenges lie in identifying policies and selecting instruments that enable the government to fulfil these roles complementing the contribution of markets

Public Management and Sustainable Development in Nigeria Robert Dibia, 2018-02-06 This title was first published in 2003. How was public policy and economic development in Nigeria affected under the period of military control between 1966 and 1999? What is the nature and scale of change that Nigeria will have to undergo in order to achieve its current development goals? Initially providing a history of Nigeria along with a framework for understanding the nature, scope and magnitude of the military and public management problems within the country, this timely and rewarding book addresses both of these questions. It analyzes the institutions that make and implement public policy in the Nigerian political arena and examines the route that Nigeria could take in order to enhance its public management capacities. Although the specific focus is on Nigeria, the mode of analysis used is transferable to a wide variety of developing nations. The book will foster an understanding among scholars, development planners, military officers and policy makers of the tasks and challenges facing Nigeria and many sub-Saharan African nations in the twenty-first century.
