 been shown to be especially vulnerable to such external influences as natural disasters political unrest and downturns in the
 global economy and their tourism industries have been notably affected In particular they typically have a narrow resource
 base and a fragile and often vulnerable natural environment While there is some research on islands and small states there is
 a dearth of information on the South Pacific and very little research is being undertaken in the region compared to other
 geographical regions in the world This volume brings together current work in Pacific Island tourism In this collection three
 main themes arise Images of the South Pacific Socio economic Impacts of Tourism and Pacific Island Countries and the
 Outside World The first focus is on the question of image namely stereotypes of a destination held by tourists and potential
 tourists the extent to which residents for their part really welcome visitors and the role tourism might play in changing pre

established images The second theme is tourism's impacts notably the economic and socio cultural effects of international tourism's intrusion in the region which though often hotly debated have attracted relatively little empirical research The third focus is on the challenges of how PICs articulate with their external geo political and physical environment These involve existing relations with formal colonial centres geographical isolation the need for greater air access to the outside world and for more tourists and the continuing threat to several PICs of global warming which increased air travel will inevitably exacerbate This text will be of interest to tourism students researchers and academics in the fields of tourism development studies and cultural studies Entertainment Industry Economics Harold L. Vogel, 2020-07-23 Fully updated this edition offers a unique integrated approach to the economics and financing of entertainment and media sectors
