But Not Scientists Vernon L. Grose,2006-10 The historic Science Textbook Struggle a worldwide battle about the origin of
the universe life and man erupted without warning It caught the scientific illuminati completely by surprise Why Because
science textbooks had become filled with wild unbelievable stories about the beginning of everything And those tales were
simply not scientific The universe starting with a Big Bang life arising out of a soup of lifeless amino acids humans produced
by apes those myths had only replaced ancient Greek mythology and were being passed off as scientific truths Caught in the
crossfire between educators news media textbook publishers religious notables and world renowned scientists including
nineteen Nobel laureates was a private citizen Father of six schoolchildren he had only one goal to prove that science never
will have answers for origins He was up against the arrogance of scientists who were determined to disguise their private
beliefs as being the only explanations for the origin of the universe life and man This story concludes with a great victory for
objectivity with more than 200 changes being made in textbooks over the objections of the National Academy of Sciences All
discussion about origins was transformed by admission that stories about them are based solely on personal views of
individual scientists Remarkably 3 000 scientists around the world later signed an affirmation to assure that this issue of
belief over fact in science never be repeated Wernher von Braun father of America s space program writes in the Foreword
Vernon Grose in tracing out in *Science But Not Scientists* his personal involvement in the vortex of these two forces
illustrates one more time the humanity of scientists their likelihood of being just as prejudiced and bigoted as anyone
untrained in science He properly calls for objectivity rather than scientific consensus He rightly urges that message rather
than messenger should be scrutinized and tested for validity Science will be the richer and humanity the ultimate beneficiary
by heeding this clarion call One Legacy of Paul F. Brandwein Deborah C. Fort,2010-02-16 Once again our nation has a
powerful need for a revolution devoted to creating scientists As we face the challenges of climate change global
competitiveness biodiversity loss energy needs and dwindling food supplies we find ourselves in a period where both scienti c

literacy and the pool of next generation scientists are dwindling To solve these complex issues and maintain our own national security we have to rebuild a national ethos based on sound science education for all from which a new generation of scientists will emerge The challenge is how to create this transformation Those shaping national policy today in 2009 need look no further than what worked a half century ago In 1957 Sputnik circled and sent a clarion call for America to become the world's most technologically advanced nation In 1958 Congress passed the National Defense Education Act which focused the national will and called for scholars and teachers to successfully educate our youth in science math and engineering It was during this time period that Paul F Brandwein emerged as a national science education leader to lay the foundation for the changes needed in American education to create the future scientists essential to the nation's well being
