Informatics, Management and Technology in Healthcare Arie Hasman, 2013-06-15 Biomedical informatics is becoming increasingly important as healthcare organizations worldwide implement biomedical informatics applications as part of their continued effort to improve the effectiveness of patient care and the efficiency of service delivery This book presents the full papers delivered at the 2013 International Conference on Informatics Management and Technology in Healthcare ICIMTH 2013 held in Athens Greece in July 2013 The scope of biomedical informatics is very broad including a number of technologies such as imaging sensors biomedical equipment and even organ transplant technology The 90 papers included here examine research and applications outcomes from cell to population in these diverse fields and because management and organizational issues play an important role in the implementation phase of biomedical informatics applications these topics are also covered as an integral part of the theme The book will be of interest to all those whose work involves the development and use of biomedical informatics applications

Advances in Informatics, Management and Technology in Healthcare Emmanouil Zoulias, Arie Hasman, Mowafa S. Househ, Marianna Diomidous, Joseph Liaskos, 2022-08-15 Data science informatics and technology have inspired health professionals and informaticians to improve healthcare for the benefit of all patients and the field of biomedical and health informatics is one which has become increasingly important in recent years This volume presents the papers delivered at ICIMTH 2022 the 20th International Conference on Informatics Management and Technology in Healthcare held in Athens Greece from 1-3 July 2022 The ICIMTH Conference is an annual scientific event attended by scientists from around the world working in the field of biomedical and health informatics This year thanks to the improvement in the situation as regards the COVID 19 pandemic and the consequent lifting of restrictions the conference was once again a live event but virtual sessions by means of teleconferencing were also enabled for those unable to travel due to local restrictions The field of biomedical and health informatics was examined from a very broad perspective with participants presenting the research and application outcomes of informatics from cell to populations including several technologies such as imaging sensors biomedical equipment and management and organizational aspects including legal and social issues More than 230 submissions were received with a total of 130 accepted as full papers and 19 as short communication and poster papers after review As expected a significant number of papers were related to the COVID 19 pandemic Providing a state of the art overview of biomedical and health informatics the book will be of interest to all those working in the field of healthcare researchers and practitioners alike

Integrating Information Technology and Management for Quality of Care J. Mantas, M.S. Househ, A. Hasman, 2014-07-24 The impact of information technology on the management of healthcare has been enormous in recent years and it continues to grow in scope and complexity This book presents papers from the 2014 International Conference on Informatics Management and Technology in Healthcare ICIMTH held in Athens Greece in July 2014 The book includes 79 full papers and 12 poster presentations as well as keynotes

two workshops and three tutorials Papers are divided into sections including clinical informatics decision support and intelligent systems e learning and education health informatics information management and technology assessment healthcare IT mobile technology in healthcare public health informatics and issues social and legal issues and telemedicine The book will be of interest to all those whose work involves the use of biomedical and health informatics **Enabling Health Informatics Applications** J. Mantas,A. Hasman,M.S. Househ,2015-07-24 Informatics and technology have long been indispensable to the provision of healthcare and their importance continues to grow in this field This book presents the 65 full papers presented at the 13th annual International Conference on Informatics Management and Technology in Healthcare ICIMTH 2015 held in Athens Greece in July 2015 The conference attracts scientists and practitioners from all continents and treats the field of biomedical informatics in a very broad framework examining the research and applications outcomes of informatics from cell to population and covering a number of technologies such as imaging sensors and biomedical equipment as well as management and organizational subjects such as legal and social issues The conference also aims to set research priorities in health informatics This overview of current research and development will be of interest to all those whose work involves the use of biomedical informatics in the planning provision and management of healthcare

The Importance of Health Informatics in Public Health during a Pandemic Arie Hasman,Mowafa S. Househ,Emmanouil Zoulias,2020-07-15 The COVID 19 pandemic has increased the focus on health informatics and healthcare technology for policy makers and healthcare professionals worldwide This book contains the 110 papers from 160 submissions accepted for the 18th annual International Conference on Informatics Management and Technology in Healthcare ICIMTH 2020 held virtually in Athens Greece from 3 5 July 2020 The conference attracts scientists working in the field of Biomedical and Health Informatics from all continents and this year it was held as a Virtual Conference by means of teleconferencing due to the COVID 19 pandemic and the consequent lockdown in many countries around the world The call for papers for the conference started in December 2019 when signs of the new virus infection were not yet evident so early submissions were on the usual topics as announced But papers submitted after mid March were mostly focused on the first results of the pandemic analysis with respect to informatics in different countries and with different perspectives of the spread of the virus and its influence on public health across the world This book therefore includes papers on the topic of the COVID 19 pandemic in relation to informatics reporting from hospitals and institutions from around the world including South Korea Europe and the USA The book encompasses the field of biomedical and health informatics in a very broad framework and the timely inclusion of papers on the current pandemic will make it of particular interest to all those involved in the provision of healthcare everywhere *Informatics and Technology in Clinical Care and Public Health* Arie Hasman,Mowafa S. Househ,Emmanouil Zoulias,Joseph Liaskos,2022-02-15 Data informatics and technology are now among the most important aspects inspiring health professionals and informaticians to improve healthcare for the benefit of patients This book presents the proceedings

of the 19th annual International Conference on Informatics Management and Technology in Healthcare ICIMTH 2021 held as a virtual event due to COVID 19 pandemic restrictions on 16 and 17 October 2021 in Athens Greece The ICIMTH conferences are a series of scientific events which bring together scientists working in the field of biomedical and health informatics from around the world The 2021 conference examined the field of biomedical and health informatics in a very broad framework presenting the research and application outcomes of informatics from cell to populations and including a number of technologies such as imaging sensors and biomedical equipment as well as management and organizational aspects including legal and social issues and the setting of research priorities in health informatics A significant number of the papers included here relate to the COVID 19 pandemic Providing an insight into the latest developments in biomedical and health informatics the book will be of interest to all those working in the field

well as promoting a new analysis of hospital organization for decision making regarding technology. Despite healthcare complexity and challenges, current models of management and organization of technology in hospitals still have evolved over those established 40-50 years ago according to totally different circumstances and technologies available now. The current health context based on new technologies demands working with an updated model of management and organization which requires a re-engineering perspective to achieve appropriate levels of clinical effectiveness, efficiency, safety, and quality.

Healthcare Technology Management Systems presents best practices for implementing procedures for effective technology management focused on human resources as well as aspects related to liability and the appropriate procedures for implementation. Presents a new model for hospital organization for Clinical Engineers and administrators to implement Healthcare Technology Management (HTM). Understand how to implement Healthcare Technology Management (HTM) and Health Technology Assessment (HTA) within all types of organizations including Human Resource impact, Technology Policy and Regulations, Health Technology Planning (HTP) and Acquisition as well as Asset and Risk Management. Transfer of knowledge from applied research in CE, HTM, HTP and HTA from award-winning authors who are active in international health organizations such as the World Health Organization (WHO), Pan American Health Organization (PAHO), American College of Clinical Engineering (ACCE) and International Federation for Medical and Biological Engineering (IFMBE).

ICT for Health Science Research Amnon Shabo (Shvo), Inge Cort Madsen, Hans-Ulrich Prokosch, Kristiina Häyrynen, Klaus-Hendrik Wolf, Fernando Martin-Sanchez, Matthias Löbe, 2019-04-15. Information and Communications Technology (ICT) is used in healthcare and health science research in application domains such as clinical trials and the development of drug and medical devices as well as in translational medicine with the aim of improving prevention, diagnosis and interventions in health and care. This book presents accepted papers from the 2019 European Federation of Medical Informatics conference (EFMI STC 2019) held in Hanover, Germany from 7-10 April 2019. More than 90 submissions were received from which, after review, the Scientific Program Committee (SPC) accepted 50 full papers to be included in this volume of proceedings. In addition, 16 poster presentations were accepted. This year, ICT for Health Science Research was selected as the focus topic and the conference also honors Prof. Peter Leo Reichertz (1930-1987), one of the founding fathers of ICT in healthcare and an originator of the term Medical Informatics. The conference focuses on recent research data privacy, interoperability, data-driven decision support, mobile data capture and ICT for clinical trials. The book will be of interest to all healthcare researchers and practitioners whose work involves the use of ICT.

National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1992. XII Mediterranean Conference on Medical and Biological Engineering and Computing 2010 Nicolas Pallikarakis, Panagiotis D. Bamidis, 2010-05-28. Over the past three decades, the exploding number of new technologies and applications introduced in medical practice, often powered by advances in biosignal processing and biomedical imaging, created an amazing account of new possibilities for diagnosis and therapy but also raised

major questions of appropriateness and safety The accelerated development in this field alongside with the promotion of electronic health care solutions is often on the basis of an uncontrolled diffusion and use of medical technology The emergence and use of medical devices is multiplied rapidly and today there exist more than one million different products available on the world market Despite the fact that the rising cost of health care partly resulting from the new emerging technological applications forms the most serious and urgent problem for many governments today another important concern is that of patient safety and user protection issues that should never be compromised and expelled from the Biomedical Engineering research practice agenda

Health Technology Literacy: A Transdisciplinary Framework for Consumer-Oriented Practice Maryalice Jordan-Marsh, 2010-08-31 Health Technology Literacy is a must read for anyone who cares about the future of health and health care and how technology is already shaping a new consumer oriented vision of that future As one of today's leading scholars in the area of consumer facing health technologies Dr Jordan Marsh has written a book that helps the rest of us understand how taking better care of ourselves is being played out in the digital age Katharyn A May DNSc RN FAAN Professor and Dean School of Nursing University of Wisconsin Madison Book Jacket **PROP - Healthcare Information Systems Custom E-Book** Anthem, 2014-05-05 PROP Healthcare Information Systems Custom E Book **Personal Medical Information** Ross Anderson, 2012-12-06 In the last few years the protection of computerised medical records and of other personal health information has become the subject of both technical research and political dispute in a number of countries In Britain the issue arose initially as an argument between the British Medical Association and the Department of Health over whether encryption should be used in a new medical network In Germany the focus was the issue to all patients of a smartcard to hold insurance details and facilitate payment while in the USA the debate has been whether federal law should preempt state regulation of computerised medical records and if so what technical and legal protection should be afforded the patient Whatever the origin and evolution of this debate in specific countries it has become clear that policy and technical matters are closely intertwined What does computer security mean in the medical context What are we trying to do What are the threats that we are trying to forestall What costs might reasonably be incurred To what extent is the existing technology largely developed to meet military and banking requirements of use And perhaps hardest of all what is the right balance between technical and legal controls As the debate spread it became clear that there was little serious contact between the people who could state the requirements clinical professionals medical ethicists and patients and the people who could explore how to meet
