Information Dashboard Design The Effective Visual Communication Of Data:

Information Dashboard Design Stephen Few, 2013 Dashboards have become a popular means to present critical information for rapid monitoring but few do this effectively When designed well dashboards engage the power of visual perception to communicate a dense collection of information efficiently with exceptional clarity This can only be achieved however by applying visual design skills that address the unique challenges of dashboards These skills are not intuitive they must be learned The author teaches a comprehensive set of effective design practices through examples that reveal what works what doesn't and why

Information Dashboard Design Stephen Few, 2006 Dashboards have become popular in recent years as uniquely powerful tools for communicating important information at a glance Although dashboards are potentially powerful this potential is rarely realized The greatest display technology in the world won't solve this if you fail to use effective visual design And if a dashboard fails to tell you precisely what you need to know in an instant you'll never use it even if it's filled with cute gauges meters and traffic lights Don't let your investment in dashboard technology go to waste This book will teach you the visual design skills you need to create dashboards that communicate clearly rapidly and compellingly Information Dashboard Design will explain how to Avoid the thirteen mistakes common to dashboard design Provide viewers with the information they need quickly and clearly Apply what we now know about visual perception to the visual presentation of information Minimize distractions cliches and unnecessary embellishments that create confusion Organize business information to support meaning and usability Create an aesthetically pleasing viewing experience Maintain consistency of design to provide accurate interpretation Optimize the power of dashboard technology by pairing it with visual effectiveness Stephen Few has over 20 years of experience as an IT innovator consultant and educator As Principal of the consultancy Perceptual Edge Stephen focuses on data visualization for analyzing and communicating quantitative business information He provides consulting and training services speaks frequently at conferences and teaches in the MBA program at the University of California in Berkeley He is also the author of Show Me the Numbers Designing Tables and Graphs to Enlighten Visit his website at www.perceptualedge.com
