Information Operations Matters Information Operations Matters:

Information Operations Matters Leigh Armistead, 2010 Introduced in 1998 by the Department of Defense the concept of information operations IO proposed to revolutionize the ways in which warfare diplomacy and business were conducted However this transformation has not come to fruition Two large gaps remain between policy and theory and between the funding needs of IO initiatives and the actual funds the federal bureaucracy is willing to provide to support these operations These two discrepancies are central to the overall discussions of Information Operations Matters Leigh Armistead explains why these gaps exist and suggests ways to close them Also in discussing best practices in IO he clarifies how the key agencies of the U S government can use the inherent power of information to better conduct future strategic communication campaigns Information Operations Matters presents a more pragmatic approach to IO recommending that IO policy be made surrounding usable concepts definitions theories and capabilities that are attainable with the resources available To meet the threats of the future as well as those facing us today Armistead argues it is necessary to use this new area of operations to the greatest extent possible

Information Operations Matters Leigh Armistead, 2010-04 A new approach to U S information operations *Information Operations* Joint Forces Staff College (U.S.), 2004 The modern means of communication have turned the world into an information fishbowl and in terms of foreign policy and national security in post Cold War power politics helped transform international power politics Information operations IO in which time zones are as important as national boundaries is the use of modern technology to deliver critical information and influential content in an effort to shape perceptions manage opinions and control behavior Contemporary IO differs from traditional psychological operations practiced by nation states because the availability of low cost high technology permits nongovernmental organizations and rogue elements such as terrorist groups to deliver influential content of their own as well as facilitates damaging cyber attacks hactivism on computer networks and infrastructure As current vice president Dick Cheney once said such technology has turned third class powers into first class threats Conceived as a textbook by instructors at the Joint Command Control and Information Warfare School of the U S Joint Forces Staff College and involving IO experts from several countries this book fills an important gap in the literature by analyzing under one cover the military technological and psychological aspects of information operations The general reader will appreciate the examples taken from recent history that reflect the impact of IO on U S foreign policy military operations and government organization

Military Review, 2011 **Professional Journal of the United States Army**, 2011 **Combined Arms Center (CAC) Research and Publication Index**, 2011 Index to selected publications of the Combined Arms Center **Lessons From Kosovo: The KFOR Experience**, 2002-01-01 Civil military unity of effort has been an essential yet frustrating elusive requirement for success in post cold war peace operations The need to coordinate collaborate and share information between civilian and military entities is on the rise and deemed essential requirements for success Today s information and communications

technologies serve to facilitate the exchange of information among the disparate players of peace operations but the ability to actually realize open information sharing in real world coalition operations remains problematic The integration of relevant information and the timely dissemination of the processed information to interested parties in the field is well within the realities of today s technology Increased civil military involvement in peacekeeping and humanitarian operations around the world is matched in part by the rise in the number and complexity of these situations There are many more actors on today s peace operations landscape with competing as well as common interests and expectations The need to improve cooperation coordination and more open information sharing is on the rise Efforts to improve and facilitate more open working together and information sharing among the disparate participants must overcome a continuing lack of trust among the civil military actors obsolete national and international policies unrealistic legal and funding constraints and outdated organization cultural traditions and behavior patterns Additionally all actors need to better understand each other and the roles they can and should play in an increasingly complex operational environment In order to obtain closure and improve the future situation the actors must develop relationships based on mutual trust and there must be a clear understanding that cooperation coordination and information sharing is a two way street In reality inefficiencies are inherent in any multilateral activity and competing interests and fear of loss of power and prestige make unity of effort a desired objective but also one that will be difficult to achieve Furthermore information is power and can be an effective means to an end but only if it can be interpreted shared and used effectively for military political or civil use Information can also help reduce uncertainty and provide those that possess it a decided advantage in the decisionmaking process There continues to be a general lack of trust among the players coupled with the lack of a shared understanding of the added value through more open and improved information sharing Information sharing among the actors on the peace operations landscape continues to be largely a manual process These obstacles need to be recognized and to the extent possible practical recommendations developed for ameliorating them Application of new technology must go beyond simply modernizing existing practices and capabilities The civil military community needs to look at new ways of doing business and how the rapidly advancing information technology can be used to leverage the power of information to help achieve timely and appropriate success of peace operations The patterns of conflict for the post cold war environment are changing and so are the approaches to military command and control Advances in information technology have enabled organizations and individuals to more effectively leverage the power of information yet for coalition operations where information sharing is essential to meet mission needs it continues to be problematic The issue is not technology but largely the will on the part of organizations and individuals to make it happen There is also a number of policy doctrine C4ISR systems cultural and environmental challenges that influence the ability to achieve more open sharing of information in coalition operations

Boone Bartholomees,Army War College (U.S.). Strategic Studies Institute,2012 This edition of the U S Army War College Guide to National Security Policy and Strategy continues to reflect the structure and approach of the core national security strategy and policy curriculum at the War College The 5th Edition is published in two volumes that correspond roughly to the Department of National Security and Strategy s core courses Theory of War and Strategy and National Security Policy and Strategy Like previous editions this one is based on its predecessor but contains both updates and new scholarship Over a third of the chapters are new or have undergone significant rewrites Many chapters some of which appeared for years in this work have been removed Nevertheless the book remains unchanged in intent and purpose Although this is not primarily a textbook it does reflect both the method and manner we use to teach strategy formulation to America s future senior leaders The book is not a comprehensive or exhaustive treatment of either strategic theory or the policymaking process Both volumes are organized to proceed from the general to the specific Thus the first volume opens with general thoughts on the nature and theory of war and strategy proceeds to look at the complex aspect of power and concludes with specific theoretical issues Similarly the second volume begins by examining the policy strategy process moves to a look at the strategic environment and concludes with some specific issues This edition continues
