Science Fiction and the Moral Imagination Russell Blackford, 2017-09-05 In this highly original book Russell Blackford

discusses the intersection of science fiction and humanity's moral imagination. With the rise of science and technology in the 19th century and our continually improving understanding of the cosmos, writers and thinkers soon began to imagine futures greatly different from the present. Science fiction was born out of the realization that future technoscientific advances could dramatically change the world. Along with the developments described in modern science fiction—space societies, conscious machines, and upgraded human bodies, to name a few—come a new set of ethical challenges and new forms of ethics. Blackford identifies these issues and their reflection in science fiction. His fascinating book will appeal to anyone with an interest in philosophy or science fiction or in how they interact. This is a seasoned, balanced analysis of a major issue in our thinking about the future seen through the lens of science fiction, a central art of our time. Everyone from humanists to technologists should study these ideas and examples. Blackford's book is wise and savvy and a delight to read as well. Greg Benford, author of *Timescape*.

"Do You Consider Yourself a Postmodern Author?" Rudolf Freiburg, 1999. This book presents a collection of twelve interviews with eminent English contemporary writers held during a period of four years. The book allows an illuminating insight into a very lively and thought-provoking literary culture stirred not only by recent ideas of postmodernism but also by the manifold issues of nationality, culture, and gender subjected to permanent redefinitions towards the end of the twentieth century. The interviews with Peter Ackroyd, John Banville, Julian Barnes, Alain de Botton, Maureen Duffy, Tibor Fischer, John Fowles, Romesh Gunasekera, Tim Parks, Terry Pratchett, Jane Rogers, and Adam Thorpe cover topics such as the relationship between writer and public, the role of the literary tradition, the relevance of contemporary literary theory for the production of literature, images of nationality, intertextuality, changes in the attitude towards language and meaning, and the reception of literary texts by critical reviewers and literary critics.

Science Fact and Science Fiction Brian M. Stableford, 2006. Publisher description.

The New Routledge Companion to Science Fiction Mark Bould, Andrew M. Butler, Sherryl Vint, 2024-06-13. The New Routledge Companion to Science Fiction provides an overview of the study of science fiction across multiple academic fields. It offers a new conceptualisation of the field today, marking the significant changes that have taken place in sf studies over the past 15 years. Building on the pioneering research in the first edition, the collection reorganises historical coverage of the genre to emphasise new geographical areas of cultural production and the growing importance of media beyond print. It also updates and expands the range of frameworks that are relevant to the study of science fiction. The periodisation has been reframed to include new chapters focusing on science fiction produced outside the Anglophone context, including South Asian, Latin American, Chinese, and African diasporic science fiction. The contributors use both well-established critical and theoretical approaches and embrace a range of new ones, including biopolitics, climate crisis, critical ethnic studies, disability studies, energy humanities, game studies, medical humanities, new materialisms, and sonic studies. This book is an invaluable resource for students and established scholars seeking to understand the vast range of engagements with science fiction in scholarship today. Chapter
