Lost Knowledge Confronting The Threat Of An Aging Workforce:

Lost Knowledge David W. DeLong, 2004-09-09 Executives today recognize that their firms face a wave of retirements over the next decade as the baby boomers hit retirement age At the other end of the talent pipeline the younger workforce is developing a different set of values and expectations which creates new recruiting and employee retention issues The evolution from an older traditional highly experienced workforce to a younger more mobile employee base poses significant challenges particularly when considered in the context of the long term orientation towards downsizing and cost cutting This is a solution oriented book to address one of the most pressing management problems of the coming years How do organizations transfer the critical expertise and experience of their employees before that knowledge walks out the door It begins by outlining the broad issues and providing tools for developing a knowledge retention strategy and function It then goes on to outline best practices for retaining knowledge including knowledge transfer practices using technology to enable knowledge retention retaining older workers and retirees and outsourcing lost capabilities

Lost Knowledge David W. De Long, 2004 Addressing one of the most vital management problems of the coming years this book asks how organisations can transfer the stores of knowledge experience from older workers to the next generation As the workforce ages so this dilemma is becoming more acute

Lost Knowledge David W. DeLong, 2007

Aging workforce : what does it mean for businesses and the economy? : hearing , *The Aging Workforce* United States. Congress. Senate. Special Committee on Aging, 2007

Managing the Aging Workforce Marius Leibold, Sven C. Voelpel, 2007-06-27 Managing the Aging Workforce is one of the crucial topics for many of the world s enterprises The increasing average age of populations does not only affect social systems countries and communities but also has a strong impact on the work of businesses and companies The decline in demographic fitness will not only hit countries like the U S the Western European countries or Japan but also the upcoming societies in China or in the Eastern European countries In many of these countries during three or four decades the average age will grow from about 40 years now to about 50 years Where experts are needed this may result in an increase of the workforce s age of between 5 and 10 years in only one decade For companies thus a number of challenges arise that have to be overcome fast and continuously The main topics in this field will be new strategies in leadership new concepts in health management new ways in knowledge management and learning as well as new models how to drive ideas for diversity and innovation On the one hand enterprises therefore will have to invest in their aging employees for supporting their talents helping them to learn and keeping them in the company On the other they will have to increase productivity keep on searching for new products and integrate experts from abroad This has to be combined with new ways of strategies and HR management This book presents an analysis of the present and upcoming situation and an introduction into the strategic concepts enterprises will need to survive in aging societies
