Mental Health, Intellectual and Developmental Disabilities and the Ageing

Process Vee P. Prasher, Philip W. Davidson, Flavia H. Santos, 2020-12-22 This book brings together findings from research and clinical practice with comprehensive coverage of the important aspects of mental health in ageing persons with intellectual and developmental disabilities It is crucial for professionals involved in the care of persons with all intellectual and developmental disabilities to have a broad understanding of the essential range of issues and therefore this book provides a truly multi disciplinary perspective complete with many figures and illustrations to underline the key points Undoubtedly research and clinical practice are much more advanced in the general ageing population than in persons with intellectual and developmental disabilities and so professionals and academics must be made fully aware of commonalities and idiosyncrasies of older people with intellectual and developmental disabilities This book presents the ongoing developments concerning mental health and aging which will become relevant to the intellectually disabled population Through experience this book

also acknowledges that the impact on the persons themselves and on their carers always needs to be taken into account with treatment programs established with a multi faceted team approach in mind Avoiding the jargon of many titles in this area while maintaining the hands on approach of clinical practice this book meshes the practical and scientific worlds with all chapters written by leading experts in the field Beyond the US the IASSIDD support expands the book message worldwide

Receptive Methods in Music Therapy Denise Grocke,Tony Wigram,2006-12-15 This practical book describes the specific use of receptive listening methods and techniques in music therapy clinical practice and research including relaxation with music for children and adults the use of visualisation and imagery music and collage song lyric discussion vibroacoustic applications music and movement techniques The Oxford Handbook of Music Therapy Jane Edwards,2016-06-02 Music therapy is growing internationally to be one of the leading evidence based psychosocial allied health professions meeting needs right across the lifespan Music therapy is a relational therapy in which the therapist and client collaborate to discover how music can be used to strengthen positive relating skills attending to the client s immediate and longer term needs through assessment treatment planning implementation and evaluation of a music therapy programme Music therapy is based upon the capacity of music provided by a trained and qualified practitioner to support integrate and heal trauma pain psychological distress and to develop and extend the existing capacities of the client In the Oxford Handbook of Music Therapy international leaders in the field from 10 countries have contributed their expertise to showcase contemporary music therapy They share knowledgable perspectives from multiple models of music therapy that have developed throughout the world including Nordoff Robbins Music Therapy The Field of Play Community Music Therapy and Resource Oriented Music Therapy There is extensive information provided as to how music therapists practice and with whom as well as the techniques used in music therapy individually and in groups the research basis for the work and professional and training issues in the field The book is clearly laid out in five sections contexts and populations models and approaches methods and techniques research methods and training and professional issues Course materials can be structured around the book or the book can be used as a starting point for students learning about a model or population Music therapy students will enjoy the clear descriptions of practice the clinical vignettes and the helpful pointers and tips for developing placement work Unequalled in depth and breadth this landmark publication is an essential resource for those starting out in Music Therapy as well as for experienced practitioners Music Therapy and Autism Across the Lifespan Henry Dunn,Helen Mottram,Elizabeth Coombes,Emma Maclean,Josie Nugent,2019-06-21 The use of music therapy is long established with people with Autistic Spectrum Conditions The combination of using music and relationship work in person centred approaches supports the three main areas of difficulty people with autism often experience social interaction communication and imagination Current research supports the positive psychological benefits of music therapy when people with autism spectrum conditions engage with music therapy This book celebrates the richness of music therapy approaches

and brings together the voices of practitioners in the UK With a strong focus on practice based evidence it showcases clinicians researchers and educators working in a variety of settings across the lifespan

Interprofessional Approaches for the Management of Chronic Diseases Alberto Marcos Heredia-Rizo, Maria Jesus Casuso-Holgado, Javier Martinez-Calderon , Emma K. Ho, 2024-09-30 Chronic diseases represent the leading causes of death and disability worldwide with a subsequent enormous socioeconomic burden The clinical management of these conditions often requires a multidisciplinary approach to treat the complex symptoms related to the disease and the associated problems Different healthcare systems have been experimenting with interprofessional collaboration to enhance professional effectiveness and quality of practice among professionals in an environment often constrained by resources The optimum use of resources is made possible by interprofessional collaboration which is described as an integrative cooperation of many health professions in different health disciplines including medicine nursing physical therapy psychology and occupational therapy It has been demonstrated that interprofessional care improves patient outcomes by lowering the rate of preventable adverse drug reactions morbidity and mortality and optimising prescription dosages However despite the increasing evidence on the positive impact of integrative multidisciplinary programs for people with chronic diseases there are still gaps and challenges in how to translate evidence based knowledge into well informed clinical practice The aim of this Research Topic is to explore the current status and future direction of interprofessional care teams We are open to receiving articles that explore interprofessional collaboration in the context of various clinical diagnoses including chronic pain cancer neurological ailments psychiatric problems or cardiorespiratory conditions Also the effects of new health technologies on interprofessional collaboration such as virtual reality mobile health apps or telecare
