Guarino Guarini And His Architecture:

Guarino Guarini and His Architecture Harold Alan Meek, 1990-02-01 Guarino Guarini 1624 1683 was one of the outstanding architects of the late Italian Baroque whose work in Sicily and Turin was later to be profoundly influential in Austria southern Germany and Bohemia This book the first about Guarini in English examines his life and architectural achievements **Guarino Guarini and His Architecture** Harold Alan Meek, Guarino Guarini, Queen's University, 1985

Guarino Guarini and His Architecture Harold Alan Meek, 1988-01-01 Ge illustreerde studie over het werk van de Italiaanse architect 1624 1683 **A World History of Architecture** Marian Moffett, Michael W. Fazio, Lawrence Wodehouse, 2003

The Roman architect and engineer Vitruvius declared firmitas utilitas and venustas firmness commodity and delight to be the three essential attributes of architecture These qualities are brilliantly explored in this book which uniquely comprises both a detailed survey of Western architecture including Pre Columbian America and an introduction to architecture from the Middle East India Russia China and Japan The text encourages readers to examine closely the pragmatic innovative and aesthetic attributes of buildings and to imagine how these would have been praised or criticized by contemporary observers Artistic economic environmental political social and technological contexts are discussed so as to determine the extent to which buildings met the needs of clients society at large and future generations Nexus Network Journal 11,3 Kim

Williams, 2010-04-28 Baroque architect and mathematician Guarino Guarini is the subject of this issue of the Nexus Network Journal A group of international scholars were invited to contribute papers that shed light on the unanswered questions in several areas Baroque architecture in general and Guarini s architecture in particular philosophy history of structural mechanics mathematics and history of mathematics cosmology As always the NNJ takes an interdisciplinary approach to the broad range of subjects that Guarini concerned himself with thus the final results will add significantly to our understanding of how Guarini s actual practical and technical processes were informed by knowledge of his multifaceted scientific and philosophical interests Guarino Guarini Carol Ann Goetting, 2012 Guarino Guarini s dome of San Lorenzo in Turin is

singular There are three predominate features that make it so first the pattern of the exposed ribs second the radical opening of the webbing between the ribs and third the conceit that it is not fully supported by the structure below it While scholars have long questioned the reasoning behind the domes appearance the impetus for its creation has not been fully addressed

Architecture of Italy Jean Castex, 2008-01-30 Covering all regions of Italy from Turin s Palace of Labor in northern Italy to the Monreale Cathedral and Cloister in Sicily and all periods of Italian architecture from the first century Colosseum in Rome to the Casa Rustica apartments built in Milan in the 1930s this volume examines over 70 of Italy s most important architectural landmarks Writing in an authoritative yet engaging style Jean Castex professor of architectural history at the Versailles School of Architecture describes the features functions and historical importance of each structure Besides identifying location style architects and periods of initial construction and major renovations the cross referenced and

Architecture and Mathematics from Antiquity to the Future Kim Williams, Michael J. Ostwald, 2015-02-11

Every age and every culture has relied on the incorporation of mathematics in their works of architecture to imbue the built environment with meaning and order Mathematics is also central to the production of architecture to its methods of measurement fabrication and analysis This two volume edited collection presents a detailed portrait of the ways in which two seemingly different disciplines are interconnected Over almost 100 chapters it illustrates and examines the relationship between architecture and mathematics Contributors of these chapters come from a wide range of disciplines and backgrounds architects mathematicians historians theoreticians scientists and educators Through this work architecture may be seen and understood in a new light by professionals as well as non professionals Volume II covers architecture from the Late Renaissance era through Baroque Ottoman Enlightenment Modern and contemporary styles and approaches Key figures covered in this volume include Palladio Michelangelo Borromini Sinan Wren Wright Le Corbusier Breuer Niemeyer and Kahn Mathematical themes which are considered include linear algebra tiling and fractals and the geographic span of the volume's content includes works in the United States of America and Australia in addition to those in Europe and Asia

Guarino Guarini's Theatine Architecture Susan Elizabeth Klaiber, 1993

Historical Dictionary of Francesco Borromini Lilian H. Zirpolo, 2025-07-10

Francesco Borromini was one of the most notable architects of the 17th century and though he fell into disfavor by the end of the following century today he is classified as one of the most innovative architects in history Although Borromini enjoyed a highly successful career he was already subjected to intense criticism during his lifetime Criticism continued well after Borromini's death when the most often used word to assess his work was bizarre Critics begrudged the fact that in their view Borromini ignored the traditional rules of architecture that had been established by the ancients and revived during the Renaissance era They did not recognize that Borromini was indeed an avid student of both ancient and Renaissance architecture and that he often borrowed elements from these two eras but then applied them to his structures in new and inventive ways It was not until art historians began assessing Borromini's architecture in a sober and nonjudgmental manner in the late 19th century that he was finally given his proper place in the history of architecture This book assesses Borromini's individual commissions following the proper scholarly methodology as well as his biographical details artistic development relationship with his protectors and patrons and external circumstances that might have

determined his artistic output This book emphasizes the innovations Borromini introduced to the field of architecture and how these influenced later artists
