How Come? Kathy Wollard, 1999-01-01 Answers to approximately 135 of kids science questions about people animals and the natural world such as why cats purr and why our fingers wrinkle in water How Come? Planet Earth Kathy Wollard, 1999-10-01 Answers to approximately 135 of kids science questions about people animals and the natural world such as why cats purr and why our fingers wrinkle in water HOW AND WHY WE CAME FROM PLANET MARS TO PLANET EARTH Philip Omoniyi Adetiloye, PhD, 2024-02-27 Science religion and mysticism offer different views on human origin human purpose of existence and the future trajectory of human civilization Science theories regard these quests as products of chance permutations Religion and mysticism claim on the other hand that human origin human purpose of existence and the future trajectory of human civilization had been predetermined by a supreme intelligence that would lead humankind to perfection and the attainment of holiness and heaven Professor Philip Omoniyi Adetiloye's eureka experience and mental illumination during his doctoral research in the late seventies enabled him to discover the links among science religion and mysticism which he has fully exposed in his ingenious books After decades of more advanced research he now offers his insightful revelations and new scientific theories on the origin purpose and possible future trajectory of humankind His findings offer the long sought paradigm shift that revealed the missing link between science and the spiritual His insight has earned him various international recognitions as one of the foremost scientists of the twenty first century and a living legend His new science theories combine the thinking of the best human minds ever in science religion and philosophy This book *How and Why We Came from Planet Mars to Planet Earth* is one of his insightful revelations This is the third of the publication series by the Foundation for Advancement of Culture and Science *Planet Earth* Cesare Emiliani, 1992-08-28 This book explains why we have such a vast array of environments across the cosmos and on our own planet and also a stunning diversity of plant and animal life on earth **Planet Earth, Past and Present** Michael Carroll, 2023-10-18 The Earth is not the world it once was and it is not the world it will always be This book describes the exciting complex and occasionally baffling history of our own planet Over the course of its 4.5 billion years Earth has undergone astonishing changes to its surface and atmosphere at times more closely resembling other planets in our Solar System than the habitable teeming biosphere of today Through these otherworldly analogs author/illustrator Michael Carroll teaches readers about different aspects of our own planet's past Our nearest cosmic neighbor Venus offers insights into Earth's own young atmosphere and surface while Saturn's moon Titan may offer a window into the genesis of life on Earth *Planet Earth Past and Present* explores these and many more connections Original art accompanies each chapter depicting major stages of the Earth's evolution and providing vivid comparisons to other planets or moons Come along on this journey through the Solar System a journey that ultimately leads us home **Arcturians: How to Heal, Ascend, and Help Planet Earth** David K. Miller, 2013-04-01 On the Mayan Calendar every day of the year represents the energy of one of the twenty solar glyphs and

one of the thirteen numbers called tones The solar glyph indicates your soul purpose and the tone is the energy you will use to attain this purpose

A Man From Planet Earth Giancarlo Genta,2015-08-26 Sometime in the not too distant future unbeknownst to Earth the Galaxy is home to a number of spacefaring societies This confederation enforces a strict protocol forbidding any contact with civilizations that have not yet achieved both a substantial spacefaring capability and sufficient maturity to control the technology explosion before triggering their own extinction While this policy is intended to only bring in peaceful new members matters change entirely when the confederation is threatened by some unknown entity is the menace real or imagined The confederation decides to break with the rules and sends a delegate to Earth to hire one of the supposedly belligerent Earthlings to investigate and to revive the confederation s long unused starfleet The Earthman agrees but demands a high price should he succeed the confederation will have to accept Earth as a new member As the threat becomes ever more acute the question soon becomes which mission will prove harder saving the confederation or convincing it to accept the deal The extensive appendix written in non technical language reviews the scientific and technological topics underlying the plot ranging from the Fermi paradox space travel and artificial collective intelligence to theories on possible universal convergences in technological and biological development

The Existence Theodore Ihejieta,2018-12-21 The Existence By Theodore Ihejieta The Existence is a book of love and life that talks about the world as the existence of human beings and tells human beings to understand that the world is the love and the life It is a book of Planet Earth which the Planet Earth gave to the author because the author asked the Planet Earth for the book of the world The author is a human being who lost faith in God and called on Planet Earth to do work and save human beings from evil and death in the world This is a book of a human being who was challenged by evil and death in the world and the human being called on his existence for help and protection The author did not like to die in the world and told his existence that he did not want to die because the author believed that Planet Earth has the power to save human beings in the world The Existence is the faith the hope and the charity that God challenged human beings to find and tell the mountain of evil and death to move away from human beings

How to Find a Habitable Planet James F. Kasting,2021-12-07 The amazing science behind the search for Earth like planets Ever since Carl Sagan first predicted that extraterrestrial civilizations must number in the millions the search for life on other planets has gripped our imagination Is Earth so rare that advanced life forms like us or even the simplest biological organisms are unique to the universe How to Find a Habitable Planet describes how scientists are testing Sagan s prediction and demonstrates why Earth may not be so rare after all James Kasting has worked closely with NASA in its mission to detect habitable worlds outside our solar system and in this book he introduces readers to the advanced methodologies being used in this extraordinary quest He addresses

the compelling questions that planetary scientists grapple with today What exactly makes a planet habitable What are the signatures of life astronomers should look for when they scan the heavens for habitable worlds In providing answers Kasting explains why Earth has remained habitable despite a substantial rise in solar luminosity over time and why our neighbors Venus and Mars haven't If other Earth sized planets endowed with enough water and carbon are out there he argues chances are good that some of those planets sustain life Kasting describes the efforts under way to find them and predicts that future discoveries will profoundly alter our view of the universe and our place in it This book is a must read for anyone who has ever dreamed of finding other planets like ours and perhaps even life like ours in the cosmos In a new afterword Kasting presents some recent breakthroughs in the search for exoplanets and discusses the challenges facing space programs in the near future

Alien From Earth Sobers Rodrigues ,2022-10-10 The novel Alien from Earth is a science fiction thriller It's a story of boy named Adam and his adventures to survive on an Alien planet revolving around a star called Alpha century lying 4 22 light years away from Earth The book is a saga of his struggle on that strange planet to survive by defeating the cruel nature and deadly creatures of that planet Where he also learns about his own existence without any other human around but a robot named Sage to guide him Sage a robotic machine who helps him during this journey by becoming his savior He helps him to survive on the planet which is far stange than the earth be it the climate or geography The story describes human's determination to survive in worse circumstances and fight with the nature in extreme conditions *How Did God Do It?*

Walt Huber,Rose Huber,2013-12 Have you ever wondered How Did God Do It How did God perform the many miracles and supernatural events described in the Holy Bible without violating the laws of physics and chemistry that He Himself put into place And without conflicting with the basic tenets of Judaism and Christianity This book proposes a theory that marries faith and rationality in a symphony of science and scripture The Life and Death of Planet Earth Peter D. Ward,Donald

Brownlee,2003 Planet Earth is middle aged Science has worked hard to piece together the story of the evolution of our world up to this point but only recently have we developed the understanding and the tools to describe the entire life cycle of a planet Ward and Brownlee a geologist and an astronomer respectively combine their knowledge of how the critical sustaining systems of our planet evolve through time with their understanding of the life cycles of stars and solar systems to tell the story of the second half of Earth's life The process of evolution will essentially reverse itself life as we know it will subside until only the simplest forms remain Eventually they too will disappear The oceans will evaporate the atmosphere will degrade and as the sun slowly expands Earth itself will eventually meet a fiery end From publisher description **Earth's**
