How We Age Coleen T. Murphy, 2025-05-20 How recent breakthroughs in longevity research offer clues about human aging All of us would like to live longer or to slow the debilitating effects of age In *How We Age* Coleen Murphy shows how recent research on longevity and aging may be bringing us closer to this goal Murphy a leading scholar of aging explains that the study of model systems particularly simple invertebrate animals combined with breakthroughs in genomic methods have allowed scientists to probe the molecular mechanisms of longevity and aging Understanding the fundamental biological rules that govern aging in model systems provides clues about how we might slow human aging which could lead in turn to new therapeutics and treatments for age related disease Among other vivid examples Murphy describes research that shows how changing a single gene in the nematode worm *C. elegans* doubles its lifespan extending not only the end of life but also the youthful healthy part of life Drawing on work in her own lab as well as other recent research Murphy chronicles the history and current state of the field explaining longevity's links to reproduction and mating sensory and cognitive function inheritances from our ancestors and the gut microbiome Written with clarity and wit *How We Age* provides a guide to the science what we know about aging how we know what we know and what we can do with this new knowledge

Can We Believe Genesis in an Age of Science? Mark Glaab, 2023-02-10 According to many Christian leaders early Genesis is a myth or allegory Therefore Adam and Eve never lived Eve was never tempted and Adam never sinned There was no creation week so God did not make the earth the stars the birds fish or the animals This has become the default position of many Christian teachers ministries and campuses This is not just mainline churches but evangelicals have joined the ranks of doubters in creation This is a reaction to the claims of Christians who work in the sciences claiming that evolution is now an established fact As a result creation week is put in the category of myth or allegory not history New interpretations of Genesis abound There is just one problem This may be how people interpret Scripture but it is not how Scripture interprets Scripture Scripture treats Genesis as history If you are wondering whether Genesis can be

interpreted as true history the struggle is over Jesus is not just the cornerstone of the church He is the cornerstone of creation Hearings, Reports and Prints of the Senate Committee on Appropriations United States. Congress. Senate. Committee on Appropriations,1969 **Where Science and Ethics Meet** Chris Willmott,Salvador Macip,2016-06-13 Through engaging case studies and clear explanations of the underlying science this book makes the social impacts and ethical consequences of recent advances in biomedicine understandable for general readers Recent biomedical discoveries promise considerable improvement in the quality of human life but they also hold the potential to permanently alter society Are the anticipated benefits worth the price we would have to pay for them In *Where Science and Ethics Meet* Dilemmas at the Frontiers of Medicine and Biology a biochemist and a biomedical researcher who are highly experienced in explaining ethics for lay audiences present the most innovative advances in biomedicine and enable readers to develop their own opinions about the ethical and social consequences these technologies will bring Each controversial topic in modern medicine and ethics is introduced through a hypothetical case study that highlights thorny ethical issues before explaining the key aspects of the science and technology involved and addressing the associated ethical considerations in detail The interdisciplinary treatment of the topics makes the book relevant to students of science medicine ethics law and sociology as well as health care professionals **The Impact of the Information Age on Science** United States.
