Foreign Finance in Continental Europe and the United States 1815-1870 D.C.M. Platt, 2013-11-05 First Published in 2005 This study uses the Baring archive to provide a professional and contemporary understanding of the foreign financial history of Continental Europe and the United States from the years 1815 to 1870 The material gathered in this book for France Russia Austria Spain and the United States and the conclusions reached in all the chapters go far towards supporting and confirming that the belief that capital exports give rise to growth is an inflated claim **British Historical Statistics** B. R. Mitchell, 1988-09-08 This 1988 reference book provides the major economic and social statistical series for the British Isles from the twelfth century up until 1980 81 The text provides informed access to a wide range of economic data without the labour of identifying sources or of transforming many different annual sources into a comparable time series **Owning the Earth** Andro Linklater, 2014-01-01 Barely two centuries ago most of the world's productive land still belonged either communally to traditional societies or to the higher powers of monarch or church But that pattern and the ways of life that went with it were consigned to history as a result of the most creative and at the same time destructive cultural force in the

modern era the idea of individual exclusive ownership of land This notion laid waste to traditional communal civilisations displacing entire peoples from their homelands and brought into being a unique concept of individual freedom and a distinct form of representative government and democratic institutions Other great civilizations in Russia China and the Islamic world evolved very different structures of land ownership and thus very different forms of government and social responsibility The seventeenth century English surveyor William Petty was the first man to recognise the connection between private property and free market capitalism the American radical Wolf Ladejinsky redistributed land in Japan Taiwan and South Korea after the Second World War to make possible the emergence of Asian tiger economies Through the eyes of these remarkable individuals and many more including Chinese emperors and German peasants Andro Linklater here presents the evolution of land ownership to offer a radically new view of mankind s place on the planet *The academy* ,1890
