How Assessment Supports Learning Learning Oriented Assessment In Action:

How Assessment Supports Learning David Carless, Gordon Joughin, Ngar-Fun Liu, 2006-11-01 How Assessment Supports Learning Learning oriented Assessment in Action invites teachers in higher education to rethink the purposes of assessment and to revise their assessment practices in the interests of improved student learning It combines practice theory research and extensive examples of assessment techniques to support academics in this vital part of their multi faceted role This book presents 39 innovative assessment practices from a range of disciplines and located in a clearly articulated theoretical framework This framework is congruent with outcomes based approaches currently being implemented in universities in Hong Kong and elsewhere The practices which can be modified for use in a wide range of contexts illustrate how assessment can be used to engage students in productive learning provide genuinely helpful feedback efficiently and help students learn to evaluate and improve the quality of their own work The book concludes with suggestions for responding to challenges at the interface between assessment and learning

Assessment for Experiential Learning Cecilia Ka Yuk Chan, 2022-09-29 Chan s book explores the challenges in assessing experiential learning deepens our understanding and inspires readers to think critically about the purpose of assessment in experiential learning Experiential learning has been studied and proven to be effective for student learning particularly for the development of holistic competencies i e 21st century skills soft skills transferable skills considered essential for individuals to succeed in the increasingly global and technology infused 21st century society Universities around the world are now actively organising experiential learning activities or programmes for students to gain enriching and diversified learning experiences however the assessment of these programmes tends to be limited unclear and contested Assessment plays a central role in education policies and students approach to learning But do educators know how to assess less traditional learning such as service learning entrepreneurship cross discipline or cross cultural projects internships and student exchanges While the current assessment landscape is replete with assessments that measure knowledge of core content areas such as mathematics law languages science and social studies there is a lack of assessments and research that focus on holistic competencies How do we assess students ability to think critically problem solve adapt self manage and collaborate Central to the discussion in this book is the reason students are assessed and how they should be assessed to bring out their best learning outcomes Offering a collection of best assessment practice employed by teachers around the world this volume brings together both theoretical and empirical research that underpins assessment and perceptions of different stakeholders understanding of assessment in experiential learning from students teachers and policymakers The idea of assessment literacy also plays an important role in experiential learning for example reflection is often used in assessing students in experiential learning but how reflection literate are educators are they aware of the ethical dilemmas that arise in assessing students These questions are discussed in detail The volume also introduces a quality assurance programme to recognise student development within experiential

learning programmes The book will be particularly informative to academic developers teachers students and community partners who struggle with the development and assessment for experiential learning those who plan to apply for funding in experiential learning and policymakers and senior managements seeking evidence and advice on fine tuning curricular assessment designs and quality assurance The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

working and studying in higher education Handbook of Second Language Assessment Dina Tsagari, Jayanti Banerjee, 2016-03-07 Second language assessment is ubiquitous. It has found its way from education into questions about access to professions and migration. This volume focuses on the main debates and research advances in second language assessment in the last fifty years or so, showing the influence of linguistics, politics, philosophy, psychology, sociology, and psychometrics. There are four parts which, when taken together, address the principles and practices of second language assessment while considering its impact on society. Read separately, each part addresses a different aspect of the field. Part I deals with the conceptual foundations of second language assessment with chapters on the purposes of assessment and standards and frameworks as well as matters of scoring, quality assurance, and test validation. Part II addresses the theory and practice of assessing different second language skills, including aspects like intercultural competence and fluency. Part III examines the challenges and opportunities of second language assessment in a range of contexts. In addition to chapters on second language assessment on a national scale, there are chapters on learning-oriented assessment as well as the uses of second language assessment in the workplace and for migration. Part IV examines a selection of important issues in the field that deserve attention. These include the alignment of language examinations to external frameworks, the increasing use of technology to both deliver and score second language tests, the responsibilities associated with assessing test takers with special needs, the concept of voice in second language assessment, and assessment literacy for teachers and other test and score users.

Classroom-based Assessment in L2 Contexts Dina Tsagari, 2016-06-22 This edited volume addresses issues that promote the notion of Classroom-based Language Assessment (CBLA) for the academic community and beyond. The book explores recent thinking and research on CBLA within the fields of language testing, assessment, and general education, based on theoretical and research papers presented at the recent CBLA SIG EALTA Symposia held in Cyprus and the pre-conference EALTA workshops in various countries around Europe. The volume contains 17 chapters which involve both high-stakes tests and classroom-based assessments conducted by academics, professionals, and researchers in the field. It brings together high-quality submissions that cover a gap in a research area that has long been in need of theoretical and empirical attention. Overall, this edited collection, with its international scope, offers a ground-breaking resource, bringing together in a balanced relationship the fields of education and second language testing and assessment.

Approaches to Assessment that Enhance Learning in Higher Education Stylianos Hatzipanagos, Rebecca Rochon, 2014-10-10 This book addresses the need to diversify mainstream forms of assessment currently used in Higher Education in order to re-establish the focus on the learning process. Making assessment central to student learning is about returning to what current research emphasises: the primary beneficiary of assessment should be the student. To achieve this in the assessment context, students and tutors must engage in a process of dialogue and feedback. It seems to be widely accepted that assessment succeeds when the learner monitors, identifies, and then is able to bridge the gap between current learning achievements and agreed goals. It is, however,

more questionable whether adequate opportunities are given to students to be active participants in closing what has been termed the loop Contributors to this book have responded in different ways to the challenge of enhancing learning through assessment offering reasons for the lack of focus on learning within assessment processes as well as suggesting possible solutions The chapters demonstrate a balance between innovation and practicality drawing on the underpinning theories The result is both rich in discussion and an extremely useful resource for practitioners This book was originally published as a special issue of Assessment Evaluation in Higher Education
