Engineering Vibroacoustic Analysis Stephen A.

Hambric, Shung H. Sung, Donald J. Nefske, 2016-05-02. The book describes analytical methods based primarily on classical modal synthesis, the Finite Element Method (FEM), Boundary Element Method (BEM), Statistical Energy Analysis (SEA), Energy Finite Element Analysis (EFEA), Hybrid Methods (FEM/SEA), and Transfer Path Analysis, and Wave Based Methods. The book also includes procedures for designing noise and vibration control treatments, optimizing structures for reduced vibration and noise, and estimating the uncertainties in analysis results. Written by several well-known authors, each chapter includes theoretical formulations along with practical applications to actual structural acoustic systems. Readers will learn how to use vibroacoustic analysis methods in product design and development, how to perform transient, frequency, deterministic, and random, and statistical vibroacoustic analyses, and how to choose appropriate structural and acoustic computational methods for their applications. The book can be used as a general reference for practicing engineers or as a text for a technical short course or graduate course.

Developing Creativity in the Classroom Todd Kettler, Kristen N. Lamb, Dianna R.

Mullet, 2021-09-03. *Developing Creativity in the Classroom* applies the most current theory and research on creativity to support the design of teaching and learning. Creative thinking and problem solving are at the heart of learning and application as students prepare for innovation-driven careers. This text debunks myths about creativity and teaching and instead illustrates productive conceptions of creative thinking and innovation, including a constructivist learning approach in which creative thinking enhances and strengthens conceptual understanding of the curriculum. Through models of teaching

that support creativity and problem solving this book extends the idea of a creative pedagogy to the four core curriculum domains Developing Creativity in the Classroom focuses on explanations and examples of how creative thinking and deep learning merge to support engaging learning environments rising to the challenge of developing 21st century competencies
