The process of firm level adaptation and survival have historically been of great interest to researchers of firms. However, these researchers have previously been denied an ecological framework within which to study the processes through which individual firms respond to and indeed modify their individual environments. This book remedies this situation providing the first comprehensive introduction to organisational autecology or the study of individual firms and the environments they interact with and typically modify to ensure their survival. In addition to establishing the theoretical and philosophical foundations of organisational autecology, the empirical application of this new approach is demonstrated and its future application to the domain of organisational studies is contemplated.

Unitary Developmental Theory and Organization Development, Volume 2 Myles Sweeney, 2022-11-30 This book introduces Unitary Developmental Theory (UDT) to the field of organization development. The second of two volumes, it introduces the UDT model and examines its application to organization development and change management. The book presents UDT comprising seven developmental levels showing how using its methodical progression can help to avoid issues such as unsustainable growth and change failure while examining how the model improves collaboration, digital transformation, change management, and team development. It shows how the model clinically transforms concepts such as culture, which is often cited as the cause of failure for change, redefining it as habituated maturation stage and simplifying culture change accordingly. This book is designed to accompany Volume 1, which details the psychology of the model and its equal applicability to mental health recovery. Showing how UDT can be used as an overarching model to optimize organization development, this book will be of great interest to researchers, scholars, and postgraduate students from the fields of organizational psychology, organization development, and change management.
