How Musical Is Man:

How Musical is Man? John Blacking, 1973 This important study in ethnomusicology is an attempt by the author a musician who has become a social anthropologist to compare his experiences of music making in different cultures He is here presenting new information resulting from his research into African music especially among the Venda Venda music he discovered is in its way no less complex in structure than European music Literacy and the invention of nation may generate extended musical structures but they express differences of degree and not the difference in kind that is implied by the distinction between art and folk music Many if not all of music's essential processes may be found in the constitution of the human body and in patterns of interaction of human bodies in society Thus all music is structurally as well as functionally folk music in the sense that music cannot be transmitted or have meaning without associations between people If John Blacking's guess about the biological and social origins of music is correct or even only partly correct it would generate new ideas about the nature of musicality the role of music in education and its general role in societies which like the Venda in the context of their traditional economy will have more leisure time as automation increases

How Musical is Man? John Blacking, 1973 *How Musical Is Man* explores the role of music in society and culture and of society and culture in music The author and anthropologist and ethnomusicologist draws examples from Western music and from the music of the Transvaal Venda people

Music, Culture, and Experience John Blacking, 1995-03-15 One of the most important ethnomusicologists of the century John Blacking achieved international recognition for his book *How Musical Is Man* Known for his interest in the relationship of music to biology psychology dance and politics Blacking was deeply committed to the idea that music making is a fundamental and universal attribute of the human species He attempted to document the ways in which music making expresses the human condition how it transcends social divisions and how it can be used to improve the quality of human life This volume brings together in one convenient source eight of Blacking's most important theoretical papers along with an extensive introduction by the editor Drawing heavily on his fieldwork among the Venda people of South Africa these essays reveal his most important theoretical themes such as the innateness of musical ability the properties of music as a symbolic or quasi linguistic system the complex relation between music and social institutions and the relation between scientific musical analysis and cultural understanding

Chican@ Artivistas Martha Gonzalez, 2020-07-27 As the lead singer of the Grammy Award winning rock band Quetzal and a scholar of Chicana o and Latina o studies Martha Gonzalez is uniquely positioned to articulate the ways in which creative expression can serve the dual roles of political commentary and community building Drawing on postcolonial Chicana black feminist and performance theories *Chican Artivistas* explores the visual musical and performance art produced in East Los Angeles since the inception of NAFTA and the subsequent anti immigration rhetoric of the 1990s Showcasing the social impact made by key artist

activists on their communities and on the mainstream art world and music industry Gonzalez charts the evolution of a now canonical body of work that took its inspiration from the Zapatista movement particularly its masked indigenous participants and that responded to efforts to impose systems of labor exploitation and social subjugation Incorporating Gonzalez s memories of the Mexican nationalist music of her childhood and her band s journey to Chiapas the book captures the mobilizing music poetry dance and art that emerged in pre gentrification corners of downtown Los Angeles and that went on to inspire flourishing networks of bold innovative activists

In the Houses of the Holy Susan Fast,2001-09-20 This volume examines the powerful ways in which identity can be shaped by rock music Through the music imagery and discourse surrounding one of the most innovative and commercially successful rock bands ever Susan Fast probes such issues as constructions of gender and sexuality the creation of myth and the use of ritual the appropriation of Eastern musics and the blues the physicality of the music and the use of the body in performance The band s influence is examined through socially situated musical analysis as well as an ethnographic study of Led Zeppelin fans Fast draws on academic and journalistic writing as well as a new interview with band member John Paul Jones Specific pieces examined include Dazed and Confused Kashmir Stairway to Heaven and Whole Lotta Love

Music as Theology Maeve Louise Heaney,2012-09-01 The conversation between music and theology dormant for too long in recent years is at last gathering pace And rightly so There will always be theologians who will regard music as a somewhat peripheral concern too trivial to trouble the serious scholar and in any case almost impossible to engage because of its notorious resistance to words and concepts But an increasing number are discovering again what many of our forbears realized centuries ago that the kinship between this pervasive feature of human life and the search for a Christian intelligence of faith is intimate and ineradicable Maeve Heaney s ambitious wide ranging and energetic book pushes the conversation further forward still Her approach is unapologetically theological grounded in the passions and concerns of mainstream doctrinal theology And yet she is insisting that music must be given its due place in the ecology of theology Although convinced that music should not be set up as a rival to linguistic or conceptual articulation let alone swallow up traditional modes of theological language and thought she is equally convinced that music is an irreducible means of coming to terms with the world a unique vehicle of world disclosure and as such can generate a particular form of understanding there are things which God may only be saying through music If this is so it is incumbent on the theologian to listen

Musical Practice as a Form of Life Eva-Maria Houben,2019-09-13 How is musical practice connected with everyday life Eva Maria Houben shows that performing music as an activity indeed as playing is a meaningful shift from an approach based on structural analysis Musical practice Eva Maria Houben contends can be understood as open and never finished Such an emphasis on repetition offers freedom from perfection productivity and purpose thus allowing meaning to unfold in specific situations places and relationships Musical practice can become a form of life and a reality in its own right The study includes musical examples from the 17th 18th 19th

and 20th centuries as well as contemporary music The Political Force of Musical Beauty Barry Shank, 2014-03-17 In *The Political Force of Musical Beauty* Barry Shank shows how musical acts and performances generate their own aesthetic and political force creating however fleetingly a shared sense of the world among otherwise diverse listeners Rather than focusing on the ways in which music enables the circulation of political messages he argues that communities grounded in the act and experience of listening can give rise to new political ideas and expression Analyzing a wide range of beautiful music within popular and avant garde genres including the Japanese traditions in the music of Takemitsu Toru and Yoko Ono the drone of the Velvet Underground and the insistence of hardcore punk and Riot grrrl post punk Shank finds that when it fulfills the promise of combining sonic and lyrical differences into a cohesive whole musical beauty has the power to reorganize the basis of social relations and produce communities that recognize meaningful difference *Music in the Late Twentieth Century* Richard Taruskin, 2006-08-14 The universally acclaimed and award winning Oxford History of Western Music is the eminent musicologist Richard Taruskin's provocative erudite telling of the story of Western music from its earliest days to the present Each book in this superlative five volume set illuminates through a representative sampling of masterworks the themes styles and currents that give shape and direction to a significant period in the history of Western music *Music in the Late Twentieth Century* is the final installment of the set covering the years from the end of World War II to the present In these pages Taruskin illuminates the great compositions of recent times offering insightful analyses of works by Aaron Copland John Cage Milton Babbitt Benjamin Britten Steve Reich and Philip Glass among many others He also looks at the impact of electronic music and computers the rise of pop music and rock n roll the advent of postmodernism and the contemporary music of Laurie Anderson John Zorn and John Adams Laced with brilliant observations memorable musical analysis and a panoramic sense of the interactions between history culture politics art literature religion and music this book will be essential reading for anyone who wishes to understand this rich and diverse period *New Approaches to Theatre Studies and Performance Analysis* Günter Berghaus, 2011-05-02 This volume gathers 16 papers originally written for the occasion of the 49th Colston Symposium held in Bristol in 1997 and substantially revised for this publication They reflect on some of the key developments in the discipline of Theatre Studies over the past fifty years and combine this with a discussion of new trends and approaches especially in the fields of Performance Studies reception analysis interculturalism sociocultural analysis theatre anthropology dance and movement analysis computer assisted reconstruction of performance venues street theatre guerilla theatre ritual theatre etc How Musical in Man? , 1991 **The Semiotic Sphere** Thomas A. Sebeok, Jean Umiker-Sebeok, 2012-12-06 Although semiotics has in one guise or another flourished uninterruptedly since pre Socratic times in the West and important semiotic themes have emerged and developed independently in both the Brahmanic and Buddhist traditions semiotics as an organized undertaking began to bloom only in the 1960s Workshops materialized with a perhaps surprising spontaneity over much of Europe Eastern and Western and in North America Thereafter others quickly

surfaced almost everywhere over the literate globe. Different places strategically allied themselves with different legacies but all had a common thrust to aim at a general theory of signs by way of a description of different sign systems, their comparative analysis and their classification. More or less permanent confederations were forged with the most diverse academic disciplines and amazingly varied frameworks were devised suited to the needs of the times and the sites to carry the work of consolidation forward. Bit by bit mutually supportive international networks were put together. Today it can truly be asserted that semiotics has become a global enterprise. This of course is far from saying that the map is uniform or even that world-wide homogeneity is in the least desirable. While our conjoint ultimate goal remains steadily in focus, the multiplicity of avenues available for its realization is inherent in the adventure of the search itself.

Duns Scotus and the Problem of Universals Todd Bates, 2010-08-26 John Duns Scotus d. 1308, known as the subtle doctor among medieval schoolmen, produced a formidable philosophical theology using and adapting an Aristotelian metaphysical framework. Critical of Thomas Aquinas' grand Summa, Scotus died before producing a final synthesis of his own. Indeed, his work left in disarray for centuries has only recently become available in an edited format. Contemporary metaphysics taking up the problem of universals treads on ground already well worked by Scotus. Duns Scotus and the Problem of Universals shows how Scotus' treatment of the problem of universals is both coherent and even by contemporary standards cogent. Todd Bates recovers and sets out Scotus' understanding of the structure of material substance, reconstructs Scotus' arguments for universals and haecceities, and shows how Scotus' theory applies to the metaphysics of the Incarnation. This book makes an important contribution to a neglected but crucial area of Scotus scholarship.

The Great Movie Musical Trivia Book, 1996 How much did Munchkins get paid? What great cultural institution stands on the site where West Side Story was filmed? Who was first considered for the role of Mary Poppins? The Great Movie Musical Trivia Book spins out revelation after revelation with entertaining answers to intriguing questions that will test the wits of even the most die-hard musical fan.

Aristotle's Theory of Substance Michael V. Wedin, 2000-06-15 Aristotle's views on the fundamental nature of reality are usually taken to be inconsistent. The two main sources for these views are the *Categories* and the central books of the *Metaphysics*, particularly book Zeta. In the early theory of the *Categories*, the basic entities of the world are concrete objects such as Socrates. Aristotle calls them primary substances. But the later theory awards this title to the forms of concrete objects. Michael Wedin proposes a compatibilist solution to this long-standing puzzle, arguing that Aristotle is engaged in quite different projects in the two works. The theory of *Metaphysics* Zeta is meant to explain central features of the standing doctrine of the *Categories* and so presupposes the essential truth of the early theory. The *Categories* offers a theory of underlying ontological configurations while book Zeta gives form the status of primary substance because it is primarily the form of a concrete object that explains its nature and this form is the substance of the

object So when the late theory identifies primary substance with form it appeals to an explanatory primacy that is quite distinct from the ontological primacy that dominates the Categories Wedin's new interpretation thus allows us to see the two treatises as complementing each other they are parts of a unified history of substance **The Descent of Man, and Selection in Relation to Sex** Charles Darwin, 1882
