connectivity is worth it Who benefits from smart technology Sadowski explains how data once the purview of researchers and policy wonks has become a form of capital Smart technology he argues is driven by the dual imperatives of digital capitalism extracting data from and expanding control over everything and everybody He looks at three domains colonized by smart technologies collection and control systems the smart self the smart home and the smart city The smart self involves more than self tracking of steps walked and calories burned it raises questions about what others do with our data and how they direct our behavior whether or not we want them to The smart home collects data about our habits that offer business a window into our domestic spaces And the smart city where these systems have space to grow offers military grade surveillance capabilities to local authorities Technology gets smart from our data We may enjoy the conveniences we get in return the refrigerator says we re out of milk but Sadowski argues smart technology advances the interests of corporate technocratic power and will continue to do so unless we demand oversight and ownership of our data

The New Patriarchs of Digital Capitalism Ben Little,Alison Winch,2021-06-23 This book offers an original critique of the billionaire founders of US West Coast tech companies addressing their collective power influence and ideology their group dynamics and the role they play in the wider sociocultural and political formations of digital capitalism Interrogating not only the founders political and economic ambitions but also how their corporations are omnipresent in our everyday lives the authors provide robust evidence that a specific kind of patriarchal power has emerged as digital capitalism s mode of command The New Patriarchs examined over the course of the book include Sergey Brin and Larry Page of Google Elon Musk of Tesla Jeff Bezos of Amazon Mark Zuckerberg of Facebook and Peter Thiel We also include Sheryl Sandberg The book analyses how these mostly men legitimate their rapidly acquired power tying a novel kind of socially awkward but visionary masculinity to exotic forms of shareholding Drawing on a ten million word digital concordance the authors intervene in feminist debates on patriarchy masculinity and postfeminism locating the power of the founders as emanating from a specifically racialised structure of oppression tied to imaginaries of the American frontier the patriarchal household and settler colonialism This is an important interdisciplinary contribution suitable for researchers and students across Digital Media Media and Communication and Gender and Cultural Studies
