draw the characteristic curve of a zener diode and to determine its reverse break down voltage 10 To study the characteristics of a common emitter npn or pnp transistor and to find out the values of current and voltage gains

Activities

- To study effect of intensity of light by varying distance of the source on a L D R
- To identify a diode a LED a transistor and IC a resistor and a capacitor from mixed collection of such items
- Use of multimeter to i identify base of transistor ii distinguish between npn and pnp type transistors iii see the unidirectional flow of current in case of a diode and a LED iv check whether a given electronic component e g diode transistor or I C is in working order
- To observe refraction and lateral deviation of a beam of light incident obliquely on a glass slab
- To observe polarization of liquid using two Polaroids
- To observe diffraction of light due to a thin slit
- To study the nature and size of the image formed by i convex lens ii concave mirror on a screen by using a candle and a screen for different distances of the candle from the lens mirror
- To obtain a lens combination with the specified focal length by using two lenses from the given set of lenses

Suggested Investigatory Projects

- To investigate whether the energy of a simple pendulum is conserved
- To determine the radius of gyration about the centre of mass of a metre scale as a bar pendulum
- To investigate changes in the velocity of a body under the action of a constant force and determine its acceleration
- To compare effectiveness of different materials as insulators of heat
- To determine the wavelengths of laser beam by diffraction
- To study various factors on which the internal resistance emf of a cell depends
- To construct a time switch and study dependence of its time constant on various factors
- To study infrared radiations emitted by different sources using photo transistor
- To compare effectiveness of different materials as absorbers of sound
- To design an automatic traffic signal system using suitable combination of logic gates
- To study luminosity of various electric lamps of different powers and make
- To compare the Young's modulus of elasticity of different specimens of rubber and also draw their elastic hysteresis curve
- To study collision of two balls in two dimensions
- To study frequency response of i a resistor an inductor and a capacitor ii RL circuit iii RC circuit iv LCR series circuit
