Remember that safety is the first and last concern of you and your students. Check all accelerometer rubber bands before coming to the park. Require students to have one hand on the ride at all times. Many of the values you will find on this page were done experimentally but most were based on values provided by Knott's Berry Farm, so allow for some variations. If you would like to participate in the planning and selection of ride questions and solutions, sign up in the Boardwalk Ballroom. Please keep this page "teacher confidential."

**Commonly Asked Questions in Physics** Andrew Rex, 2014-02-12 In the 300 years since Newton's seminal work, physics has explained many things that used to be mysterious. But there are always more questions. Suitable for a wide audience.

*Mad about Physics* Christopher Jargodzki, Franklin Potter, 2000-11-21 Why is there eight times more ice in Antarctica than in the Arctic? Why can you warm your hands by blowing gently and cool your hands by blowing hard? Why would a pitcher scuff a baseball? Which weighs more, a pound of feathers or a pound of iron? Let science experts Christopher Jargodzki and Franklin Potter guide you through the curiosities of physics and you'll find the answers to these and hundreds of other quirky conundrums. You'll discover why sounds carry well over water, especially in the summer; how a mouse can be levitated in a magnetic field; why backspin is so important when shooting a basketball; and whether women are indeed as strong as men. With nearly 400 questions and answers on everything from race cars to jumping fleas to vanishing elephants, *Mad about Physics* presents a comprehensive collection of braintwisters and paradoxes that will challenge and entertain even the brainiest of science lovers. Whether you're a physicist by trade or just want to give your brain a power workout, this collection of intriguing and unusual physics challenges will send you on a highly entertaining ride that reveals the relevance of physics in our everyday lives.

*Physics Is...: The Physicist Explores Attributes of Physics* F. Todd Baker, 2016-12-21 He's back! The physicist returns with an entirely new compilation of questions and answers from his long-lived website where laypeople can ask questions about anything physics-related. This book focuses on adjectives: practical, beautiful, surprising, cool, frivolous, instead of nouns like the first two books: atoms, photons, quanta, mechanics, relativity. The answers within *Physics Is* are responses to people looking for answers to fascinating and often uninformed questions. It covers topics such as sports, electromagnetism, gravitational theory, special relativity, superheroes, videogames, and science fiction. These books are designed for laypeople and rely heavily on concepts rather than formalism. That said, they keep the physics correct and don't water down, so expert physicists will find this book and its two companion titles fun reads. They may actually recognize similar questions posed to them by friends and family. As with the first two books, *Physics Is* ends with a chapter with questions from people who think that The physicist is a psychic and from people who think they have the answers to life, the universe, and everything.
