God And Nature Historical Essays On The Encounter Between Christianity And Science:

God and Nature David C. Lindberg, Ronald L. Numbers, 1986-04-29 Since the publication in 1896 of Andrew Dickson White's classic *History of the Warfare of Science with Theology in Christendom* no comprehensive history of the subject has appeared in the English language. Although many twentieth century historians have written on the relationship between Christianity and science and in the process have called into question many of White's conclusions, the image of warfare lingers in the public mind. To provide an up to date alternative based on the best available scholarship and written in nontechnical language, the editors of this volume have assembled an international group of distinguished historians. In eighteen essays prepared especially for this book, these authors cover the period from the early Christian church to the twentieth century, offering fresh appraisals of such encounters as the trial of Galileo, the formulation of the Newtonian worldview, the coming of Darwinism, and the ongoing controversies over scientific creationism. They explore not only the impact of religion on science but also the influence of science and religion. This landmark volume promises not only to silence the persistent rumors of war between Christianity and science but also serve as the point of departure for new explorations of their relationship. Scholars and general readers alike will find it provocative and readable. God and nature : historical essays on the encounter between Christianity and science David C. ; Numbers, Lindberg (Ronald L.), 1986 *The Warfare between Science & Religion* Jeff Hardin, Ronald L. Numbers, Ronald A. Binzley, 2018-10-15 A very welcome volume of essays questioning the presumption of irreconcilable conflict between science and religion. *British Journal for the History of Science*. The conflict thesis, the idea that an inevitable irreconcilable conflict exists between science and religion, has long been part of the popular imagination. *The Warfare between Science and Religion* assembles a group of distinguished historians who explore the origin of the thesis, its reception, the responses it drew from various faith traditions, and its continued prominence in public discourse. Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals, including John William Draper and Andrew Dickson White, who through their polemical writings championed the conflict thesis relentlessly. Others consider what the thesis meant to different religious communities, including evangelicals, liberal Protestants, Roman Catholics, Eastern Orthodox Christians, Jews, and Muslims. Finally, essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual discourse today. Based on original research and written in an accessible style, the essays in *The Warfare between Science and Religion* take an interdisciplinary approach to question the historical relationship between science and religion and bring much needed perspective to an often bitter controversy. Contributors include Thomas H. Aechtner, Ronald A. Binzley, John Hedley Brooke, Elaine Howard Ecklund, Noah Efron, John H. Evans, Maurice A. Finocchiaro, Frederick Gregory, Bradley J. Gundlach, Monte Harrell, Hampton Jeff Hardin, Peter Harrison, Bernard Lightman, David N. Livingstone, David Mislin, Efthymios Nicolaidis, Mark A. Noll, Ronald L. Numbers, Lawrence M. Principe, Jon H. P. Moreland, 1989-06-01 A defense of the scientific view of creationism Evangelicals and Science in Historical Perspective

David N. Livingstone, D. G. Hart, Mark A. Noll, 1999-04-08 In the eighteenth and nineteenth centuries evangelicals often took their place among prominent practicing scientists and their perspectives exerted a considerable impact on the development of modern western science. Over the last century however evangelical scientists have become less visible even as the focus of evangelical engagement has shifted to political and cultural spheres. *Evangelicals and Science in Historical Perspective* offers the first wide ranging survey of the history of the encounter between evangelical Protestantism and science. Comprising papers by leading historians of science and religion this collection shows that the questions of science have been central to the history of evangelicalism in the United States as well as in Britain and Canada. It will be an invaluable resource for understanding the historical context of contemporary political squabbles such as the debate over the status of creation science and the teaching of evolution.

The Blackwell Companion to Nineteenth-Century Theology David Fergusson, 2010-03-18 Bringing together a collection of essays by prominent scholars *The Blackwell Companion to Nineteenth Century Theology* presents a comprehensive account of the most significant theological figures, movements and developments of thought that emerged in Europe and America during the nineteenth century. Representing the most up to date theological research this new reference work offers an engaging and illuminating overview of a period whose forceful ideas continue to live on in contemporary theology. A new reference work providing a comprehensive account of the most significant theological figures and developments of thought that emerged in Europe and America during the nineteenth century. Brings together newly commissioned research from prominent international Biblical scholars, historians and theologians covering the key thinkers, confessional traditions and major religious movements of the period. Ensures a balanced ecumenical viewpoint with essays covering Catholic, Russian and Protestant theologies. Includes analysis of such prominent thinkers as Kant and Kierkegaard, the influence and authority of Darwin and the natural sciences on theology and debates the role and enduring influence of the nineteenth century anti theologians.

Science and Religion Gary B. Ferngren, 2017-03-01 An essential examination of the historical relationship between science and religion. Since its publication in 2002 *Science and Religion* has proven to be a widely admired survey of the complex relationship of Western religious traditions to science from the beginning of the Christian era to the late twentieth century. In the second edition eleven new essays expand the scope and enhance the analysis of this enduringly popular book. Tracing the rise of science from its birth in the medieval West through the scientific revolution the contributors here assess historical changes in scientific understanding brought about by transformations in physics, anthropology and the neurosciences and major shifts marked by the discoveries of Copernicus, Galileo, Isaac Newton, Charles Darwin and others. In seeking to appreciate the intersection of scientific discovery and the responses of religious groups contributors also explore the theological implications of contemporary science and evaluate approaches such as the Bible in science and the modern synthesis in evolution which are at the center of debates in the

historiography understanding and application of science The second edition provides chapters that have been revised to reflect current scholarship along with new chapters that bring fresh perspectives on a diverse range of topics including new scientific approaches and disciplines and non Christian traditions such as Judaism Islam Asiatic religions and atheism This indispensable classroom guide is now more useful than ever before Contributors Richard J Blackwell Peter J Bowler John Hedley Brooke Glen M Cooper Edward B Davis Alnoor Dhanani Diarmid A Finnegan Noah Efron Owen Gingerich Edward Grant Steven J Harris Matthew S Hedstrom John Henry Peter M Hess Edward J Larsen Timothy Larson David C Lindberg David N Livingstone Craig Martin Craig Sean McConnell James Moore Joshua M Moritz Mark A Noll Ronald L Numbers Richard Olson Christopher M Rios Nicolaas A Rupke Michael H Shank Stephen David Snobelen John Stenhouse Peter J Susalla Mariusz Tabaczek Alan C Weissenbacher Stephen P Weldon and Tomoko Yoshida Religion and Science in Context Willem B. Drees,2009-09-10 How should we think about religion science and their relationship in modern society Some religious groups oppose evolution some atheists claim science is on their side Others reconcile their beliefs with science or consider science and faith to deal with fundamentally different aspects of human life What indeed is religion belief or trust in God s existence How do we distinguish sense from superstition What does science have to say on such issues Willem B Drees considers contemporary discussions of these issues in Europe and North America using examples from Christianity and religious naturalism and reflections on Islam and Tibetan Buddhism He argues that the scientific understanding leaves open certain ultimate questions and thus allows for belief in a creator but also for religious naturalism or serious agnosticism By analysing the place of values in a world of facts and the quest for meaningful stories in a material world Religion and Science in Context offers an original and self critical analysis of the field its assumptions and functions and ends with a vision of its possible future The Routledge Companion to Modern Christian Thought Chad Meister,James Beilby,2013-10-28 This Companion provides an unrivalled view of the field of modern Christian thought from the Enlightenment to the twentieth century and beyond Written by an outstanding team of theologians and philosophers of religion it covers the following topics within Christian thought Key figures and influencers Central events and movements Major theological issues and key approaches to Christian Theology Recent topics and trends in Christian thought Each entry is clear and accessible making the book the ideal resource for students of Christian thought and history and philosophy of religion and a valuable reference for professional theologians and philosophers *Nature and the Godly Empire* Sujit Sivasundaram,2005-11-17 A study of the relations between nineteenth century science and Christianity Science and Christianity Tim Reddish,2016-08-15 Too often conversations on Science and Christianity skate over much deeper assumptions or perceptions on the nature and interpretation of Scripture and the nature of science and of God Instead the rhetoric goes quickly towards contentious issues like evolution global warming or genetic engineering without establishing a framework of mutual understanding Consequently conversations can take place between people who completely misunderstand each other because those

foundations have not been clearly articulated In this introductory book you are invited on a journey of discovery one that makes us self aware of our starting assumptions It is only from a framework of critical engagement with both science and the Bible that contemporary issues and the needs of the church and society can be addressed While the Creator is one who brings order this book also reminds us that untamed chaos also has a God ordained place within creation The author explores the element of chance that seems to be at the heart of nature and shows how this can be incorporated constructively within Christian thinking Nature is not mere mechanism and is more open than we might first think This means that miracles are scientifically plausible and prayer can really change things

Galileo's Mistake Wade Rowland,2011-12-03 The modern understanding of the notorious 1633 trial of Galileo is that of Science and Reason persecuted by Ignorance and Superstition of Galileo as a lonely courageous freethinker oppressed by a reactionary and anti intellectual institution fearful of losing its power and influence But is this an accurate picture In his provocative reexamination of one of the turning points in the history of science and thought Wade Rowland contends that the dispute concerned an infinitely more profound question What is truth and how can we know it Rowland demonstrates that Galileo s mistake was to insist that science and only science provides the truth about reality The Church rejected this idea declaring that while science is valid truth is a metaphysical issue beyond physics and it involves such matters as meaning and purpose which are unquantifiable and therefore not amenable to scientific analysis In asserting the primacy of science on the territory of truth Galileo strayed into the theological realm an act that put him squarely on a warpath with the Church The outcome would change the world Wade Rowland s thoughtful exploration promises to disarm the most stubborn of skeptics and make for scintillating debate

Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Incarnation and Physics Tapio Luoma,2002-08-15 Thomas F Torrance is the most prominent theologian to have taken seriously the challenge posed to theology by the natural sciences His model for interaction between the two disciplines is based on the theological heart of the Church the Incarnation Luoma here offers a thorough overview and critique of Torrance s insights into the theology science dialogue

Nature and Scripture in the Abrahamic Religions: God, Scripture and the rise of modern science (1200-1700) Jitse M. van der Meer,Scott Mandelbrote,2008 These volumes describe how the development of the different styles of interpretation found in reading scripture and nature have transformed ideas of both the written word and the created world

Science and Religion David Marshall,2012-10-15 Science and Religion is a record of the 2009 Building Bridges seminar a dialogue between leading Christian and Muslim scholars convened annually by the Archbishop of Canterbury The essays in this volume explore how both faith traditions have approached the interface between

science and religion and throw light on the ongoing challenges posed by this issue today The volume includes a selection of relevant texts together with commentary that illuminates the scriptures the ideas of key religious thinkers and also the legacy of Charles Darwin

Science, Religion, and the Protestant Tradition James C. Ungureanu, 2019-10-03 The story of the conflict thesis between science and religion the notion of perennial conflict or warfare between the two is part of our modern self understanding As the story goes John William Draper 1811 1882 and Andrew Dickson White 1832 1918 constructed dramatic narratives in the nineteenth century that cast religion as the relentless enemy of scientific progress And yet despite its resilience in popular culture historians today have largely debunked the conflict thesis Unravelling its origins James Ungureanu argues that Draper and White actually hoped their narratives would preserve religious belief For them science was ultimately a scapegoat for a much larger and more important argument dating back to the Protestant Reformation where one theological tradition was pitted against another a more progressive liberal and diffusive Christianity against a more traditional conservative and orthodox Christianity By the mid nineteenth century narratives of conflict between science and religion were largely deployed between contending theological schools of thought However these narratives were later appropriated by secularists freethinkers and atheists as weapons against all religion By revisiting its origins development and popularization Ungureanu ultimately reveals that the conflict thesis was just one of the many unintended consequences of the Protestant Reformation

Islam and The English Enlightenment Zulfiqar Ali Shah, 2022-06-02 Never before to my knowledge has the cross fertilisation of Western and Islamic ideas been so encyclopedically documented as it is here In reading Islam and the English Enlightenment you will never see the relationship between Islam and the West in the same way again ROBERT F SHEDI NGER Professor of Religion Luther College Dr Zulfiqar Ali Shah s Islam and the English Enlightenment is one of the most profoundly enlightening books I have read in years Dr Shah compellingly demonstrates that the thinkers of English Enlightenment were undeniably indebted to Islamic sciences and thought and that the foundational principles of rationalist thought scientific inquiry and religious toleration were deeply anchored in the Islamic tradition KHALED ABOU EL FADL Omar Azmeralda Alfi Distinguished Professor of Law UCLA School of Law This is a book that anyone interested in stepping outside a Eurocentric view of the rise of the West and of the modern age must read MICHAEL A GILLESPIE Professor of Political Science Philosophy Duke University Dr Shah convincingly demonstrates the central role that Islam played in shaping the values and ideas of the Enlightenment reformers such as John Locke and Isaac Newton who had helped to produce the modern world GERALD MACLEAN Emeritus Professor University of Exeter

The Creation/Evolution Controversy Kary D. Smout, 1998-10-28 This rhetorical study of the various language strategies and competing worldviews involved in the 140 year argument between Biblical creationists and Darwinian evolutionists focuses on the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial When Darwin published his *Origins of Species* in 1859 he initiated a debate about the origin of human life and

the role of God in human affairs scarcely equalled in world history Smout traces the response of Biblical creationists to Darwinian evolutionists Looking carefully at the stories told and the tactics used by both sides he analyzes all available accounts of the original debate culminating in the 1860 Huxley Wilberforce debate the 1925 Scopes Monkey Trial and the 1981 Arkansas Creation Science Trial Professor Smout argues that both sides in the controversy use various language strategies to persuade the culture as a whole to see the world that they see and to enact their position as public policy As Smout illustrates the problem is that both sides rely on an inadequate conception of language as a namer of timeless realities rather than as an instrument used by human communities to achieve their goals He attempts to articulate a better view of language and to show how it might help solve intractable arguments such as this He argues that we should see language as a tool that shapes what we see and definitions of terms as political acts rather than statements of fact made by disciplinary experts An important analysis for students and scholars in rhetoric history religion and sociology

Science and Theology
Murray Rae, Hilary Regan, John Stenhouse, 2016-10-06

In popular culture science and theology have often been portrayed as antagonistic Some writers have described the history of the debate in terms of a surrender by theology a retreat from the field of engagement theology has abandoned the public arena leaving all creation to science and has opted instead for the safer ground of ethics morality and personal or private belief Science and Theology advocates a constructive dialogue between the two subjects and suggests the topics where they might meet The essays in this volume were commissioned from leading figures around the world experts in their own disciplines but enthusiasts for debate at the science and theology interface They include Norma Emerton Owen Gingerich Nancey Murphy John Polkinghorne John Puddefoot and Carver T Yu They discuss natural theology the methodologies of science and theology and theology in the light of scientific discovery Their themes cover scientism divine action in the world the problem of evil freedom and determinism reductionism and humanity the limits of knowledge and chaos theory Together these essays offer a significant and positive contribution to one of the most exciting areas of modern thought
