Handbook Of Simulation Gaming In Social Education Constitution Today:

Handbook of Simulation Gaming in Social Education / Constitution Today Ron Stadskev, 2013-09-23 The Handbook of Simulation Games in Social Education presents the What the Why and the How of Simulation Games What are Simulation Games Why use Simulation Games How do I create and use Simulation Games When this book was first published in 1974 Ron Stadskev was one of the few pioneers seeking to introduce Simulation Games as a new teaching technique Now Simulation Games are in the mainstream and this expanded edition is even more salient than ever Role playing games and social simulations have been around for a long time In order for the game process to be educational it must reward participants who understand and interact within the social model effectively The Model of Autelic Inquiry presented in this Handbook shows how all these elements are incorporated into a Simulation Game The biggest challenge is developing an entertaining and playable game element without distorting the isomorphism of the social model This handbook includes several experiential learning techniques These techniques can be implemented directly from the material contained within the handbook and do not require a computer The collection of essays which comprise this handbook illustrate how these teaching techniques are used This handbook also discusses how to avoid the many pitfalls of Simulation Game design For example In the T Puzzle game participants will experience how frustration effects a person s ability to accomplish difficult tasks and the emotional change that accompanies certain activities The Land Use Simulation is a social simulation designed to demonstrate a process by which people can determine the best way to use their public land The Constitution Today is a simple simulation game designed to motivate students to study the constitution in a meaningful and personal way Students will also be using a parliamentary process called log rolling in order to achieve a high score This simulation game was used in a comparative study of simulation gaming and lecture discussion method to determine the amount of knowledge retained over time

Facilitating Learning with the Adult Brain in Mind Kathleen Taylor, Catherine Marienau, 2016-03-07 Practical brain aware facilitation tailored to the adult brain Facilitating Learning with the Adult Brain in Mind explains how the brain works and how to help adults learn develop and perform more effectively in various settings Recent neurobiological discoveries have challenged long held assumptions that logical rational thought is the preeminent approach to knowing Rather feelings and emotions are essential for meaningful learning to occur in the embodied brain Using stories metaphors and engaging illustrations to illuminate technical ideas Taylor and Marienau synthesize relevant trends in neuroscience cognitive science and philosophy of mind Readers unfamiliar with current brain discoveries will enjoy an informative easy to read book Neuroscience fans will find additional material designed to supplement their knowledge Many popular publications on brain and learning focus on school aged learners or tend more toward anatomical description than practical application This book provides facilitators of adult learning and development a much needed resource of tested approaches plus the science behind their effectiveness Appreciate the fundamental role of experience in adult learning Understand how metaphor

and analogy spark curiosity and creativity Alleviate adult anxieties that impede learning Acquire tools and approaches that foster adult learning and development Compared with other books on brain and learning this volume includes dozens of specific examples of how experienced practitioners facilitate meaningful learning These brain aware approaches can be adopted and adapted for use in diverse settings Facilitating Learning with the Adult Brain in Mind should be read by advisors counselors instructors curriculum and instructional developers professional development designers corporate trainers and coaches faculty mentors and graduate students in fact anyone interested in how adult brains learn
