An Analysis of Hans J. Morgenthau's Politics Among Nations Ramon Pacheco Pardo, 2017-07-05 Hans Morgenthau's *Politics Among Nations* is a classic of political science built on the firm foundation of Morgenthau's watertight reasoning skills The central aim of reasoning is to construct a logical and persuasive argument that carefully organizes and supports its conclusions often around a central concept or scheme of argumentation Morgenthau's subject was international relations the way in which the world's nations interact and come into conflict or peace a topic which was of vital importance during the unstable wake of the Second World War To the complex problem of understanding the ways in which the post war nations were jostling for power Morgenthau brought a comprehensive schema the concept of realism or in other words the idea that every nation will act so as to maximise its own interests From this basis Morgenthau builds a systematic argument for a pragmatic approach to international relations in which nations seeking consensus should aim for a balance of power grounding relations between states in understandings of how the interests of individual nations can be maximized Though seismic shifts in international politics after the Cold War undeniably altered the landscape of international relations Morgenthau's dispassionate reasoning about the nature of our world remains influential to this day

Guide for Professional Reading for Officers of the United States Navy and Marine Corps United States. Bureau of Naval Personnel, *International Relations* Manuela Spindler, 2013-04-10 The book is written for active learners those keen on cutting their own path through the complex and at

times hardly comprehensible world of THEORY in International Relations To aid this process as much as possible this book employs the didactical and methodical concept of integrating teaching and self study The criteria for structured learning about IR theory will be derived from an extensive discussion of the questions and problems of philosophy of science Part 1 Theory of IR refers to the scientific study of IR and covers all of the following subtopics the role and status of theory in the academic discipline of IR the understanding of IR as a science and what a scientific theory is the different assumptions upon which theory building in IR is based the different types of theoretical constructions and models of explanations found at the heart of particular theories and the different approaches taken on how theory and the practice of international relations are linked to each other The criteria for the structured learning process will be applied in Part 2 of the book during the presentation of five selected theories of International Relations The concept is based on learning through example that is the five theories have been chosen because when applying the criteria developed in Part 1 of the book each single theory serves as an example for something deeply important to learn about THEORY of IR more generally

At Home Abroad Henry R. Nau, 2002 The United States has never felt at home abroad The reason for this unease even after the terrorist attacks of September 11 2001 is not frequent threats to American security It is America's identity The United States its citizens believe is a different country a New World of divided institutions and individualistic markets surviving in an Old World of nationalistic governments and statist economies In this Old World the United States finds no comfort and alternately tries to withdraw from it and reform it America cycles between ambitious internationalist efforts to impose democracy and world order and more nationalist appeals to trim multilateral commitments and demand that the European and Japanese allies do more In *At Home Abroad* Henry R. Nau explains that America is still unique but no longer so very different All the industrial great powers in western Europe and arguably also Japan are now strong liberal democracies A powerful and peaceful new world exists beyond America's borders and anchors America's identity easing its discomfort and ending the cycle of withdrawal and reform Nau draws on constructivist and realist perspectives to show how relative national identities interact with relative national power to define U.S. national interests He provides fresh insights for U.S. grand strategy toward various countries In Europe the identity and power perspective advocates U.S. support for both NATO expansion to consolidate democratic identities in eastern Europe and concurrent but separate great power cooperation with Russia in the United Nations In Asia this perspective recommends a shift of U.S. strategy from bilateralism to concentric multilateralism starting with an emerging democratic security community among the United States Japan South Korea Australia New Zealand India and Taiwan and progressively widening this community to include reforming ASEAN states and if it democratizes China In the developing world Nau's approach calls for balancing U.S. moral identity and material power commitments avoiding military intervention for purely moral reasons as in Somalia but undertaking such intervention when material threats are immediate as in Afghanistan or material and moral stakes coincide as in Kosovo

Beyond the Ivory Tower Joseph

Lepgold, Miroslav Nincic, 2001 The gap between academics and practitioners in international relations has widened in recent years according to the authors of this book Globalization ethnic conflict and ecological threats have created a new set of issues that challenge policymakers and cutting edge scholarship can contribute a great deal to the diagnosis and handling of potentially explosive situations *Routledge Handbook of Diplomacy and Statecraft* B.J.C. McKercher, 2012-03-12 Despite post Cold War arguments about their demise Great Powers not only continue to thrive with lesser Powers they form the basis of the constellation of global politics This topical new Handbook illustrates how and why the new international order has evolved and is still evolving since the end of the Cold War through the application of diplomacy and statecraft Including cutting edge contributions from over 40 scholars the handbook is structured around seven sections Context of Diplomacy Great Powers Middle Powers Developing Powers International Organisations and Military Alliances International Economy Issues of Conflict and Co operation Through analysis of a wide range of case studies the Handbook assesses the diplomacy and statecraft of individual powers offering insights into how they function their individual perception of national interests and the roles they play in modern statecraft The contributors also seek to evaluate the organizations and contemporary issues that continue to influence the shaping of the new international order A comprehensive survey of diplomacy across the world this work will be essential reading for scholars and professionals alike Neoclassical Realist Theory of International Politics Norrin M. Ripsman, Jeffrey W. Taliaferro, Steven E. Lobell, 2016-03-25 Neoclassical realism is a major theoretical approach to the study of foreign policy In Neoclassical Realist Theory of International Relations Norrin M Ripsman Jeffrey W Taliaferro and Steven E Lobell argue that it can explain and predict a far broader range of political phenomena in international politics Neoclassical realism challenges other approaches including structural realism liberalism and constructivism *The Asia-Pacific Security Lexicon* David H. Capie, Paul M. Evans, 2007 Identifies and defines the concepts and ideas central to security discourse in the Pacific region This book looks at how concepts such as human security and non traditional security have evolved and found adherents *International Encyclopedia of Political Science* Bertrand Badie, Dirk Berg-Schlosser, Leonardo Morlino, 2011-09-07 Developed in partnership with the International Political Science Association this must have authoritative political science resource in eight volumes provides a definitive picture of all aspects of political life **Conflict: Readings in Management and Resolution** John Burton, Frank Dukes, 1990-09-25 Conflict resolution is now recognized as a major area of research Yet because of its pervasive nature as a subject drawing on so many different disciplines there has long been a need for a reader bringing together many of the most important and representative essays written to date This book aims to fill the gap Equally important a comprehensive bibliography further anchors the subject providing academics diplomats students and others interested in conflict studies with an excellent basis for future research **Collateral Damage** Nicholas Khoo, 2011-02-21 Although the Chinese and the Vietnamese were Cold War allies in wars against the French and the Americans their alliance collapsed and they ultimately fought a war against each other in 1979

More than thirty years later the fundamental cause of the alliance's termination remains contested among historians international relations theorists and Asian studies specialists Nicholas Khoo brings fresh perspective to this debate Using Chinese language materials released since the end of the Cold War Khoo revises existing explanations for the termination of China's alliance with Vietnam arguing that Vietnamese cooperation with China's Cold War adversary the Soviet Union was the necessary and sufficient cause for the alliance's termination He finds alternative explanations to be less persuasive These emphasize nonmaterial causes such as ideology and culture or reference issues within the Sino Vietnamese relationship such as land and border disputes Vietnam's treatment of its ethnic Chinese minority and Vietnam's attempt to establish a sphere of influence over Cambodia and Laos Khoo also adds to the debate over the relevance of realist theory in interpreting China's international behavior during both the Cold War and post Cold War eras While others see China as a social state driven by nonmaterial processes Khoo makes the case for viewing China as a quintessential neorealist state From this perspective the focus of neorealist theory on security threats from materially stronger powers explains China's foreign policy not only toward the Soviet Union but also in relation to its Vietnamese allies

Realist Constructivism J. Samuel Barkin, 2010-03-25

Realism and constructivism two key contemporary theoretical approaches to the study of international relations are commonly taught as mutually exclusive ways of understanding the subject Realist Constructivism explores the common ground between the two and demonstrates that rather than being in simple opposition they have areas of both tension and overlap There is indeed space to engage in a realist constructivism But at the same time there are important distinctions between them and there remains a need for a constructivism that is not realist and a realism that is not constructivist Samuel Barkin argues more broadly for a different way of thinking about theories of international relations that focuses on the corresponding elements within various approaches rather than on a small set of mutually exclusive paradigms Realist Constructivism provides an interesting new way for scholars and students to think about international relations theory

International Relations Theory Mark V. Kauppi, Paul R. Viotti, 2023-08-15 International Relations Theory offers a unique approach to help students think conceptually and critically about how our contemporary world of diverse state and non state actors works but also the implications of domestic and global changes The seventh edition covers current IR theory images realism liberalism economic structuralism and the English School interpretive understandings constructivist feminist postmodern critical theory and green theory normative considerations and intellectual foundations from the ancient world to the modern era

The Demise of the Soviet Union Jan Hallenberg, 2018-05-08 This title was first published in 2002 Designed as a research text for academics in higher education and interested practitioners this volume weaves together an original strand of international relations theory with key empirical case studies of the United States United Kingdom France and Sweden and their attitudes towards the Soviet Union Original in nature and composition the book deals with aspects of predictability in foreign policy and gauges the level of impact that international events have on domestic levels of awareness

The hypothesis and the typology are solid giving the book its strong analytical structure In sum this book is cutting edge It will be of great use as a research text to those studying the countries of Western Europe and also those with an interest in Russia and the Soviet Union Given its strong theoretical content and its choices of case study this cross disciplinary text is also suitable for area studies in general
