Ten Lectures on Event Structure in a Network Theory of Language Nikolas Gisborne, 2020-08-31 In Ten Lectures on Event Structure in a Network Theory of Language Nikolas Gisborne explores verb meaning He discusses theories of events and how a network model of language in the mind should be theorized what the lexicon is how to probe word meaning evidence for structure in word meaning polysemy the lexical semantics of causation a type hierarchy of events and event types cross linguistically He also looks at the relationship between different classes of events or event types and aktionsarten transitivity alternations and argument linking Gisborne argues that the social and cognitive embedding of language requires a view of linguistic structure as a network where even the analysis of verb meaning can require an understanding of the role of speaker and hearer

Research in Education, 1973 *Rediscovering the Spirit of Education After Scientific Management* Jim Neyland, 2010-01-01 Education is being eroded Otherwise put education is more and more being brought under the yoke of a mode of thought that reduces it to something mechanical narrowly characterized by codes predefined outcomes protocols and rules The cause it is argued is the growing dominance of a new fashion in education called scientific management Scientific management has become the new and unquestionable orthodoxy in education As a consequence it has become increasingly difficult to imagine let alone articulate an alternative This book explores the origins and fundamental assumptions of scientific management and suggests how the spirit of education might be rediscovered by turning instead to a more ethical socially interpersonal and full bodied orientation The approach taken avoids the difficulties usually associated with such ethically oriented treatments of education by drawing on recent findings in neurophysiology psychology primate and language studies The book is a Reader and is designed to both supplement and invigorate undergraduate and postgraduate courses in education and to appeal to general readers who have an interest in education

Recent Advances in Attempts to Improve Medication Adherence - from basic research to clinical practice, volume II Przemyslaw Kardas, Tamas Agh, Ines Potočnjak, Cristina Mihaela Ghiciuc, Maria Teresa Herdeiro, 2024-12-04 This exciting Research Topic is the second volume of Recent Advances in Attempts to Improve Medication Adherence from basic research to clinical practice which you can explore here Adequate implementation of evidence based long term therapies is an issue of utmost importance It has a direct impact on both individual and public health as well as on the sustainability of healthcare

systems Unfortunately despite more than half a century of extensive research and practical and awareness raising activities medication adherence remains far from perfect Many reasons are responsible for non adherence and the issue is complicated by the rapid aging of the global society the rising tide of non communicable chronic diseases multimorbidity and associated polypharmacy This might be further exacerbated by certain conditions such as the Covid 19 pandemic However one thing is perfectly clear medication non adherence is no longer merely perceived as a patient problem In fact medication adherence depends on many non patient related factors and thus is an important indicator of the quality of care Therefore instead of blaming patients need to be supported in their therapeutic journeys Thus all the stakeholders need to collectively create adherence enabling environments and support patients in the execution of their therapies
