Stiefel and Jeremy C. Wells now present a collection that seeks to address fundamental issues of preservation pedagogy outcome based education and assessment and global issues of authenticity and significance in historic preservation The editors argue that the subject of the analysis has shifted from What is the best way to fix a historic building to What are the best ways for teaching people how to preserve historic properties and why according to the various standards that have been established This important reconsideration of the state of the field in historic preservation education will appeal to a broad audience across numerous disciplines
